

STATE OF KANSAS

ADJUSTMENT TO THE 2000
U.S. DECENNIAL CENSUS

RON THORNBURGH

SECRETARY OF STATE

JULY 31, 2001

July 31, 2001

The Kansas Legislature
State Capitol
Topeka, KS 66612

Dear Legislators:

In July 1999, my office began the process of adjusting the 2000 federal census to provide the population figures for the 2002 legislative redistricting effort.

In compliance with Article 10, Section 1 of the Kansas Constitution, the following rules were observed: As of April 1, 2000, (1) all non-resident military personnel and college and university students were subtracted from the state's population total; and (2) all resident military personnel and college and university students located in Kansas were recorded in the census block of their permanent residences.

In accordance with K.S.A. 11-301 *et seq.*, I am presenting to you today a report detailing the policies, procedures and outcomes of the 2000 census adjustment. In addition to the printed report, I am submitting a CD containing an electronic version of the adjusted federal census data to the Kansas Legislative Research Department.

Please feel free to contact me with any questions you may have.

Respectfully,

A handwritten signature in black ink, appearing to read "Ron Thornburgh", with a stylized flourish at the end.

RON THORNBURGH
Secretary of State

HISTORY & BACKGROUND

History & Background

History

Kansas has had a long-standing tradition of apportioning its state legislative districts according to information assembled from statewide censuses. In the years 1918 through 1979, apportionment in Kansas was conducted in the ninth year of each decade and was conducted in accordance with population figures as submitted to the State Board of Agriculture. Under this scenario, each Kansas county was charged with collecting its own population figures, which were then returned to the State Board of Agriculture for compilation. This census became known as the Agriculture or “Ag” Census.

In 1979, the state legislature redistricted according to the most recent Agriculture Census and then voted to abolish the state census. In 1987, with redistricting on the horizon, the state legislature passed a law commissioning a one-time state census to be conducted by the Secretary of State. In 1988, the state legislature proposed an amendment to Article 10, Section 1 of the Kansas Constitution concerning reapportionment. The citizens of Kansas ratified this change by popular vote, in November of 1988. The amendment provided that beginning in 1992, redistricting of the Kansas Legislature and the State Board of Education would occur in the second year of each decade, rather than in the ninth, and would be accomplished by using federal census data adjusted by the state rather than relying on a statewide enumeration. The amendment also required the subtraction of non-resident students and military personnel who were located in Kansas on April 1 of that year and for the enumeration of all other college students and military personnel in the districts of their permanent residence.

With the passage of K.S.A. 11-301 *et seq.* during the 1989 legislative session, the task of adjusting the federal census was assigned to the Secretary of State’s office. New regulations were promulgated in 1989 to codify the procedures of the census adjustment process, and in 1992, for the first time in its history, Kansas reapportioned its state legislature according to the new provisions in Article 10, Section 1 of the state constitution.

Three Attorney General’s Opinions have been rendered in conjunction with the census adjustment project. In 1989, two opinions (AGO 89-119 and AGO 89-141) were requested to help clarify key definitions in the related statutes. In 1999, a third opinion regarding the status of technical colleges was requested.

Background

The 2000 census adjustment project was built on the foundation created by the 1990 adjustment. Although having this knowledge to draw from proved invaluable at times, significant changes in the federal census data structure and advances in technology produced a very different adjustment project in 2000.

At the federal level the most significant differences were changes made to the raw census data. Public Law 94-171 directs the U.S. Census Bureau to provide redistricting data to each of the fifty states. Significant policy changes for the 2000 U.S. decennial census made Kansas’ population recalculation more difficult than in 1990. For example, respondents to the U.S. decennial census were allowed to choose multiple answers in response to the racial composition question. This created significantly more combinations of racial diversity and, consequently, more opportunities for discrepancies between the answers given on the federal census and the Kansas adjustment questionnaire. Another key difference in the 2000 adjustment project was the

necessity to use a “block conversion” method. Each of the more than 173,000 census blocks (see Glossary) in Kansas experienced a change in its alphanumeric code for the 2000 census. Although the bureau was able to collect data according to the new blocks, the code changes were not available early enough for use in the adjustment project. Therefore, all adjustments had to be made according to 1990 blocks and then converted to their new 2000 equivalents.

Technological advances on college and university campuses also profoundly altered many aspects of the 2000 adjustment project. The most logical and convenient time to collect data from college students is during the enrollment process. The advent of “tele,” “e” and “on-line” registration required adaptations in the areas of data collection and processing.

Recognizing the profound role technological progress would play in the 2000 adjustment and 2002 redistricting, the Secretary of State and legislative leaders agreed to view their respective tasks as a joint venture rather than individual undertakings. To minimize technologically-induced conversion problems, one vendor was hired to handle both the Secretary of State’s recalculation and the Legislature’s redistricting. After a written proposal, product demonstrations, and numerous negotiating sessions, Public Systems Associates, Inc. (PSA) was chosen as the single vendor to handle both the population recalculation and reapportionment. Subsequently, PSA was relieved of their reapportionment duties by the legislature but remained under contract to complete the population recalculation.

With the exception of Saint Mary’s of the Plains, a now defunct private college, all colleges, community colleges, military installations and universities involved in the 1990 adjustment also participated in the 2000 adjustment. In addition to these institutions, degree-seeking technical colleges and branch locations of existing educational institutions were included for the first time in the 2000 adjustment.

PROCEDURES

Procedures

The Kansas census adjustment project was a multifaceted endeavor spanning two years. At the outset, the project was divided into five distinct sections; 1) preparations, 2) data collection, 3) data processing, 4) geography and 5) data interpretation. With the addition of an outside vendor, it was crucial to keep all parties apprised of policies, procedures and, more importantly, to implement consistent techniques throughout the project.

Preparations

In preparation for the 2000 census adjustment project, the Secretary of State appointed a Census Adjustment Advisory Group (CAAG) in the summer of 1999. This diverse group of men and women consisted of leaders from various civic associations and representatives from federal, state and local governmental entities. CAAG's main objective was to review the questionnaires used in the 1990 adjustment and recommend changes to make the questionnaire easier to understand, thereby increasing participation from respondents. Rather than suggesting a complete overhaul to a form that had proven successful in the past, CAAG recommended minor changes be made in language and layout. CAAG also addressed the issue of data collection and distribution methods. The Secretary of State adopted some of the group's recommendations, and revisions were made to both the student and military questionnaires.

The adjustment questionnaire also had to be updated to reflect changes made by the federal government in connection with the race and ethnicity questions. On U.S. Census forms in 2000, ethnicity became a question unto itself, and new categories were added to the racial composition question. In accordance with advice from PSA, the state adjustment form should mirror the federal census form as closely as possible. Changes were made to the adjustment questionnaire to reflect these additions.

Following the CAAG meetings, the Secretary of State updated administrative regulations applying to the adjustment project. In accordance with KSA 11-305, Kansas Administrative Regulations 7-35-1 and 7-35-2 were revised upon publication in the *Kansas Register* on September 23, 1999.

Two Attorney General's Opinions, (both issued in 1989), were reviewed for applicability to the 2000 adjustment project. The Secretary of State had requested AGO 89-119 and AGO 89-141 to provide direction to the 1990 census adjustment project. The two 1989 opinions limited the scope of the adjustment project by excluding: (1) proprietary, vocational and technical school students; and (2) college and university students not residing on the main campus grounds. However, in response to changes in the basic academic campus setting and the less traditional student population in 1999, it became evident these two opinions deserved revisiting. Societal trends suggest educational models now favor bringing the learning experience to the student, rather than the traditional format of having students inhabit one universal setting. This was evidenced by the proliferation of branch and off-site locations at the college and university level. This fact, along with a new statutory classification of technical colleges, prompted a lengthy debate about the relevance of AGO 89-119 and AGO 89-141.

An Attorney General's Opinion was requested to clarify the status of newly organized technical colleges. The answer was received in the form of AGO 99-60, which spelled out the differences between proprietary, vocational and technical schools, and the newly classified technical

colleges. AGO 99-60 advises the inclusion of technical colleges in the census adjustment because of their degree-granting nature (Associate of Arts and Associate of Applied Science).

A second action in response to AGO 89-141 was to collect facts regarding the extent of satellite locations of Kansas' universities and colleges. Administrators at educational institutions were surveyed as to the size, number and scope of their satellite locations. The data indicated the 2000 census adjustment should include students attending satellite locations.

Data Collection

According to state law (K.S.A. 11-303), the duty to distribute and collect census adjustment questionnaires resides solely with the educational institutions and military commands.

In September of 1999, the Secretary of State contacted the administrators of all Kansas universities, colleges, community colleges, technical colleges and military installations informing them of their statutory duties in the upcoming state census adjustment. Administrators were asked to designate a contact person who would oversee the distribution and collection of adjustment questionnaires.

In the weeks following, the Secretary of State's office provided numerous venues for contact-person training. The Secretary of State's staff appeared on the agenda at the Council of Institutional Research Officers, Kansas Student Affairs Conference, and the Kansas Association of Collegiate Registrars and Admissions Officers. In addition to providing training at these conferences, the Secretary of State organized a videoconference training seminar which was made available for reception at various locations across the state. All contact persons with an e-mail address received regular updates.

Surveys were distributed asking contact persons to devise a plan for the distribution and collection of adjustment questionnaires, including the type and number of questionnaires needed. Contact survey responses were returned to the Secretary of State's office throughout the remainder of 1999 and early 2000.

The distribution of adjustment questionnaires by participating institutions began in October 1999 and continued through April 2000. More than 200,000 adjustment questionnaires were distributed to Kansas' educational and military institutions.

Some schools have adopted telephone, mail and Internet registration processes. These institutions requested the Secretary of State consider accepting the electronic filing of adjustment questionnaires. The Secretary of State developed standards and procedures for the electronic filing of adjustment questionnaires. The delineation of required fields, field lengths, codes, file types and policies was developed and disseminated. Extra efforts were made to ensure the security and integrity of all electronically filed adjustment questionnaires, and all institutions were given an opportunity to participate either in whole or in part with the electronic filing.

While there was some latitude for each institution to develop an individualized distribution and collection plan, there were some key components that remained constant for all participating institutions.

- It was emphasized that according to K.S.A. 11-303 all students enrolled in the spring semester and military personnel stationed in Kansas on census day, were required to

participate in the state adjustment. Institutions were clearly informed of this obligatory “100%” goal.

- Institutions were asked to distribute and collect questionnaires from all existing satellite locations.
- There would be no need for institutions to limit the number of questionnaires returned by individuals. All duplicate questionnaires would be sorted, identified and removed by the Secretary of State.
- The return deadline for all questionnaires was June 1, 2000.
- The Secretary of State provided a toll-free telephone number on every questionnaire for respondents to call with questions.

Although institutions could choose between questionnaire formats (card, paper or electronic), there was no variation in questionnaire layout, language or content. The Secretary of State maintained uniformity in its handling and treatment of all adjustment questionnaires.

Data Processing

The Secretary of State’s office worked with PSA to design procedures for the processing of questionnaires. It was determined the Secretary of State would be responsible for the initial sorting and counting of questionnaires, and all questionnaires would receive a unique identifying number assigned by the Secretary of State. PSA was in charge of the data entry of all non-exception questionnaires, and the Secretary of State was responsible for resolving and subsequently entering into a database exceptional questionnaires.

A non-exception questionnaire consisted of respondents who indicated “yes” they are eligible to participate in the adjustment (student or military personnel), they did not consider their current address to be permanent, and they had completed the questionnaire with no missing or flawed responses. All non-exception adjusters were copied, counted and sent to PSA for processing. Over 35,000 questionnaires, (33% of the total returns), were regarded as non-exception adjusters.

A second category of questionnaires was exceptional questionnaires. A major portion of the time and effort of this project was dedicated to the resolution of exceptional questionnaires. Exceptions included questionnaires containing incomplete, missing or conflicting information, P.O. Boxes (instead of residential addresses) and rural route addresses. Approximately 10,000 questionnaires, (9% of the total returns) were unable to be immediately processed and thus regarded as exceptional questionnaires. Nearly 3,000 of these exceptions were rural route addresses. Respondents providing a rural route address often supplied their correct address information, however a rural route address cannot be electronically assigned a census block. All rural route addresses had to be manually converted by the Secretary of State’s office to their census block equivalents.

Questionnaires missing race and/or ethnicity were also classified as exceptions and slated for resolution efforts. Resolution efforts extended by the Secretary of State included:

- Phone calls
- U.S. mail
- Electronic mail
- Internet searches
- Institutional contacts
- Governmental contacts

All exceptional questionnaires were copied and counted, but remained with the Secretary of State for follow up resolution efforts and data entry.

Two institutions chose to file a portion of their questionnaires electronically. Numerous queries were run on the electronic files to pinpoint exceptional questionnaires. As resolutions were generated, they were entered into a copy of the electronic questionnaires file. A complete and corrected electronic file of questionnaire information was subsequently transferred to PSA for integration into the main database.

At the completion of the data entry phase, all addresses located in our main database were transferred to a PSA subcontractor, Geographic Data Technologies (GDT), for the assignment of 1990 census block numbers. Many of these addresses (nearly ten thousand) did not return an exact 1990 census block match. These addresses were manually assigned a census block code by the Secretary of State's office.

The third possibility for questionnaires was to be non-adjusters. Respondent's who indicated on their questionnaire they did not meet the statutory requirement to be considered a student in this project (student questionnaires only), and/or considered their current address to be their permanent address were considered non-adjusters. More than 75,000 questionnaires, (62% of the total returns) they were non-adjusters. A second reviewer verified that all questionnaires categorized as non-adjusters were correct before assigning them a permanent non-adjuster status. Non-adjusters were copied and counted by the Secretary of State, but were not included in the population recalculation.

While institutions completed their distribution and collection of questionnaires, the Secretary of State worked with PSA to design a database to accommodate information taken from questionnaires. The database resembled the actual questionnaire as closely as possible to facilitate data entry and minimize entry error. All data entry would be double blind in nature with two different operators entering the same record. The database was designed to compare double entries and indicate discrepancies. A supervisor was responsible for resolving all discrepancies by referring to the original questionnaire.

Geography

A key difference between the 1990 census adjustment and the 2000 project was in the area of geography. All census block designations underwent a change in the year 2000, new block designations were not available in time for use on the 2000 adjustment project. Therefore, block designations for all addresses in the 2000 adjustment were assigned their 1990 geocode (see Glossary), and then converted to the new 2000 designation

Block conversions could be of three varieties:

- One to one match
- One to many match
- Many to one match

If blocks had an exact one to one match then the 2000 block equivalents could be immediately assigned. However, if a 1990 block matched to many 2000 blocks, or vice versa, the conversion had to be accomplished using a block centroid method (see Glossary), including the utilization of the latitude-longitude point of a given address in relation to the new 2000 block designations.

Data Interpretation

The Secretary of State received a copy of the 2000 decennial census population data as provided by the United States Bureau of the Census in the form of P.L. 94-171. This data file became the basis for the Kansas census adjustment.

In compliance with state law, the Secretary of State adjusted relevant population and demographic census information at the census block level. This was accomplished through the use of an electronic recalculation program designed by the Secretary of State and PSA.

The recalculation program was designed to adjust not only the gross population of all affected census blocks, but also the corresponding racial, ethnic and voting age attributes of these same blocks. The recalculation program was more complicated for the 2000 adjustment due to the allowance of multiple answers to the racial composition question on the federal census form. Because multiple answers were allowed, the number of possible responses to the race question grew exponentially. This large variance had to be accounted for in the recalculation program.

In June of 2001, the recalculation program was tested, initiated and the results verified by PSA.

BUDGET SUMMARY

Census Adjustment Budget Summary and Status

The following summarizes the Secretary of State's costs related to the 2000 census adjustment project.

Contract

The Legislature and the Secretary of State entered into a joint contract with Public Systems Associates (PSA). Under the terms of the contract, the Legislature would compensate PSA for services specifically rendered for the adjustment (contract costs), and the Secretary of State would subsequently reimburse the Legislature these costs. Examples of contract costs include: database design, data entry, geocode assignments and conversions, recalculation file design and creation, report assistance and consulting.

<u>Year</u>	<u>Cost</u>	<u>Status</u>
FY 2000	\$ 20,000.00	Funded / paid
FY 2001	\$194,972.00	Funded / paid
FY 2002	\$ 45,819.00	½ Funded*
FY 2003	\$ 11,321.00	Unfunded

Off-Contract

In addition to services specifically rendered by PSA, the Secretary of State incurred numerous off-contract costs in order to perform the population recalculation. Examples of off-contract costs include: printing, postage, salaries and equipment.

<u>Year</u>	<u>Cost</u>	<u>Status</u>
FY 2000	\$ 34,230.00	Funded / paid
FY 2001	\$121,184.00	Funded / paid
FY 2002	\$ 28,500.00	Unfunded**
FY 2003	None	None

*The 2001 Legislature funded ½ (or \$22,909.50) of the FY 2002 contractual obligation. As noted above, the Secretary of State's obligation is in the form of a reimbursement to the Legislature, who is the signatory on the contract. Without full funding, the Secretary of State's reimbursement payment to the Legislature will be in jeopardy.

**Off-contract costs not funded by the 2001 Legislature may impair the ability of the Secretary of State's office to assist in future problem resolutions and/or litigation.

NOTES

Notes

Items listed are special situations requiring additional explanation.

Add Only Adjusters – A respondent to the census adjustment questionnaire who claims a permanent residence inside Kansas but a current residence outside Kansas. Most often this was a student who moved to a neighboring state to attend a Kansas educational institution situated near the state border. Presumably, this person was counted by the federal census outside of Kansas but now chooses to be added back into the state population for redistricting purposes.

Duplicate Responses on Questionnaire – Many adjustment questionnaires were returned with duplicate responses to the current and permanent address questions. Because the respondent supplied the same address to both questions they could not be adjusted to a second address. Questionnaires returned with duplicate answers to the current and permanent address questions were treated as non-adjusters.

Electronic Returns – To facilitate questionnaire distribution and collection the Secretary of State allowed institutions to electronically file adjustment questionnaire data. The Secretary of State established criteria for the electronic filing of census adjustment questionnaires, and four standards were required to be met in order for an institution to participate in the electronic filing system:

1. Security
2. Reliability / Completeness of the form
3. Convertibility
4. Compliance

Exceptional Questionnaires – The bulk of the work done on the 2000 census adjustment project was in the resolution of exceptional questionnaires. Approximately twenty thousand (20,000) problem questionnaires were resolved by the Secretary of State's office over the course of the project.

Fort Leavenworth – Fort Leavenworth initially refused to participate in the 2000 Kansas census adjustment project, citing the preemption of federal law over state law, and the prohibition on spending federal monies to conduct a state service. A lengthy discussion ensued between Fort Leavenworth and the Secretary of State. Fort Leavenworth eventually agreed to participate in the state adjustment on a limited basis. Officials at the base still refused to actively participate in the distribution and collection of questionnaires (K.S.A. 11-303); however, they agreed to allow the Secretary of State to coordinate and conduct its own distribution and collection. Acting in accordance with advice from our consultants, the Secretary of State determined limited participation at Fort Leavenworth was better than no participation and carried out the responsibilities of distributing and collecting the needed data.

Fort Riley Split Barracks – Nine housing units on Fort Riley straddle the Riley/Geary county boundary line. There was a question as to where to count the soldiers who reside in these units. The Secretary of State attempted to contact the 13 individuals in question to establish their specific residence. If the individual respondent could not be contacted, the Secretary of State relied on county election officials use of voter files to determine if the addresses in question was in Riley or Geary county.

Missing Race and/or Ethnicity - In 50 cases, census information was entered into the database without the respondents having supplied race and/or ethnicity. Many of these cases were done so because of personal objections to the line of questioning regarding racial composition. Others were entered without race or ethnicity when the questionnaires were returned without this information and all attempts to reach the respondent failed.

Negative Blocks (Population) – In 259 census blocks, the number of subtractions made by the state adjustment was larger than the population as enumerated by the federal census. All negative blocks were reviewed a second time to ensure the accuracy of the state’s subtraction. A negative block (population) can occur if the federal census allocates residents to a different census block or does not enumerate residents at all.

Negative Blocks (Race) – In 818 census blocks, the number of subtractions made by the state adjustment was larger than the population of a particular race and/or ethnicity as enumerated by the federal census. Negative blocks (race) can occur when a respondent answers the race and ethnicity questions differently on the federal census form than on the state adjustment questionnaire.

Northeast Kansas Technical College Exclusion – Although technical colleges were included in the state adjustment in 2000, Northeast Kansas Technical College had not officially received recognition by the legislature as of census day, April 1, 2000. Therefore, Northeast Kansas Technical College was not required to participate in the 2000 state census adjustment.

Responses Not from Kansas Schools – The Secretary of State received one questionnaire from a respondent indicating they did not attend a Kansas educational institution or military installation. This questionnaire was treated as a non-adjuster.

Zip+4 Inclusion – A ZIP+4 code consists of the original 5-digit ZIP Code plus a 4-digit add-on code. The 4-digit add-on number identifies a geographic segment within the 5-digit delivery area, such as a city block. Acting in accordance with advice from our vendor and consultants, the Secretary of State allowed for the adjustment of respondents returning addresses matching a more general “zip+4” location but not necessarily an exact “street level” match.

NEGATIVE CENSUS BLOCK REPORT

Negative Block Summary

After adjusting the federal census data, some negative population and race totals were produced at the block level. These negative figures represent either: 1) the entire population of a given census block, or 2) any subset of one or more racial categories within a census block. A negative total, post adjustment, does not reflect a flaw in the process of adjusting the federal census, rather it indicates the difficulties inherent in deriving a third set of data from two mutually exclusive data sets.

In 259 instances the resulting total population of a census block, post adjustment, was negative. In these cases, more respondents to our state adjustment questionnaire instructed the Secretary of State to remove them from a given census block than were enumerated in that block by the federal census.

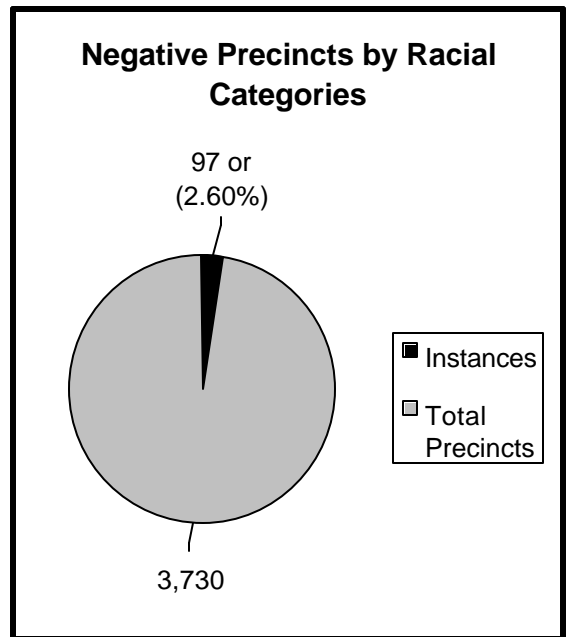

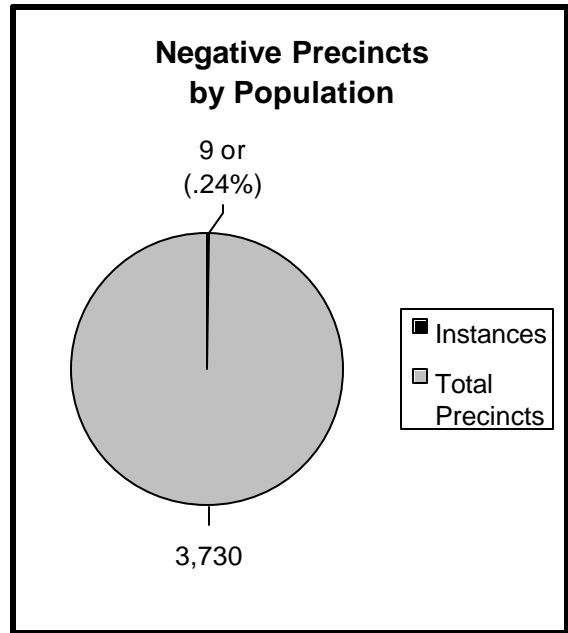

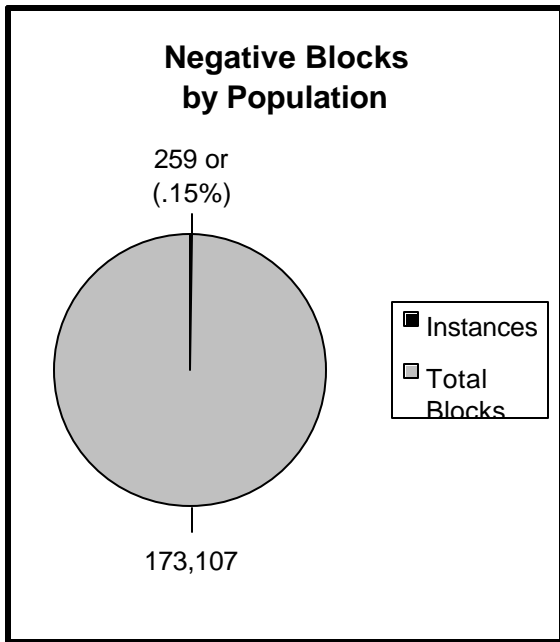

In 818 instances (including the 259 mentioned above), more respondents of a particular racial category (as defined by the U.S. Census Bureau) instructed the Secretary of State to remove them from a particular census block than were enumerated in that block by the federal census.

All 818 instances produced one or more negative racial categories per census block; however, only 259 also produced an overall negative population total.

According to state law, the federal census must be adjusted at the census block level. However, redistricting usually occurs at the precinct level. For this reason, the following table and graphs display negative totals by population and race at both the census block and precinct levels.

Census blocks are the lowest level of geography to which the U.S. Census Bureau enumerates. Viewed at a higher level of geography (precinct level), negative totals produced by the state adjustment are greatly diminished.

CHARTS 1 THROUGH 4: NEGATIVE BLOCKS AND PRECINCTS

Please see the Adjustment to the 2000 U.S. Decennial Census report on the Secretary of State's web page (www.kssos.org) for a detailed listing of all negative census blocks and precincts by population and race.

NEGATIVE BLOCKS BY POPULATION

<u>No.</u>	<u>State</u>	<u>County</u>	<u>Tract</u>	<u>Block</u>	<u>Block Pop.</u>	<u>Precinct Pop.</u>

Reference ID Explanation PL1 / Universe: Total Population

- P0010001: Total
- P0010002: Population of one race
- P0010003: White alone
- P0010004: Black or African American alone
- P0010005: American Indian and Alaska Native alone
- P0010006: Asian alone
- P0010007: Native Hawaiian and Other Pacific Islander alone
- P0010008: Some other race alone
- P0010009: Population of two or more races
- P0010010: Population of two races
- P0010011: White; Black or African American
- P0010012: White; American Indian and Alaska Native
- P0010013: White; Asian
- P0010014: White; Native Hawaiian and Other Pacific Islander
- P0010015: White; Some other race
- P0010016: Black or African American; American Indian and Alaska Native
- P0010017: Black or African American; Asian
- P0010018: Black or African American; Native Hawaiian and Other Pacific Islander
- P0010019: Black or African American; Some other race
- P0010020: American Indian and Alaska Native; Asian
- P0010022: American Indian and Alaska Native; Some other race
- P0010023: Asian; Native Hawaiian and Other Pacific Islander
- P0010024: Asian; Some other race
- P0010025: Native Hawaiian and Other Pacific Islander; Some other race
- P0010026: Population of three races
- P0010027: White; Black or African American; American Indian and Alaska Native
- P0010030: White; Black or African American; Some other race
- P0010031: White; American Indian and Alaska Native; Asian
- P0010033: White; American Indian and Alaska Native; Some other race
- P0010034: White; Asian; Native Hawaiian and Other Pacific Islander

P0010035: White; Asian; Some other race
P0010037: Black or African American; American Indian and Alaska Native; Asian
P0010039: Black or African American; American Indian and Alaska Native; Some other race
P0010040: Black or African American; Asian; Native Hawaiian and Other Pacific Islander
P0010043: American Indian and Alaska Native; Asian; Native Hawaiian and Other Pacific Islander
P0010047: Population of four races
P0010050: White; Black or African American; American Indian and Alaska Native; Some other race
P0010059: Black or African American; American Indian and Alaska Native; Asian; Some other race
P0010070: Population of six races
P0010071: White; Black or African American; American Indian and Alaska Native; Asian; Native Hawaiian and Other Pacific Islander; Some other race

CORRESPONDENCE WITH U.S. CENSUS BUREAU

June 29, 2001

U.S. Census Bureau
Count Question Resolution Program
Decennial Management Division, Room 2002/SFC-2
4700 Silver Hill Road, Stop 7100
Washington, DC 20233-7100

RE: Notice of possible errors in census block population totals

In accordance with Article 10, Section 1 of the Kansas Constitution, prior to reapportionment of our state legislature my office must cause to be made several adjustments to the federal census. These adjustments require the enumeration of university students and military personnel located in Kansas as of census day (April 1, 2000) in the district of their permanent residence. State law (K.S.A. 11-301 et seq.) requires the adjustment to occur at the census block level and the adjustments to be made to PL 94-171 population data.

During the completion of this task we have uncovered several census blocks where the population as reported by the U.S. Census Bureau is not sufficient to cover the number of people who have instructed my office to subtract them from that particular census block. My office has taken measures to ensure that the subtractions made at the state level occurred to the correct census block. These measures included reviewing and verifying addresses and their corresponding 2000 census block assignments, and reviewing negative census block instances individually.

There were originally 273 instances of negative block population totals. Through our research we have been able to resolve 14 of the largest of these cases. We believe that many of the remaining 259 instances may be attributable to the allocation of residents by the U.S. Census Bureau to an incorrect census block.

The statutory deadline for reporting our results to the legislature is July 31, 2001. We are bringing this matter to your attention, and make ourselves available for any follow up action. Enclosed you will find documentation of the 259 negative population blocks. Please review the materials and inform my office of any subsequent action.

Respectfully,

RON THORNBURGH
Secretary of State

GLOSSARY

Glossary

Census Block

A small geographic area bounded on all sides by visible features, such as streets, roads, streams and railroad tracks, and by invisible boundaries, such as city, town, township and county limits, property lines, and short, imaginary extensions of streets and roads. Census blocks are numbered uniquely within each census tract and consist of four digits. They are the smallest unit to which the U.S. Census Bureau enumerates population.

Census Tract

Small, relatively permanent, statistical subdivisions of a county delineated by either local entities or by the U. S. Census Bureau. Census tracts generally contain between 1,500 to 8,000 people, with an optimum size of 4,000 people. Census tracts are designed to be homogeneous with respect to population characteristics, economic status and living conditions. Census tracts are unique within a county. The tracts are identified by a four-digit basic number and may have a two-digit numeric suffix.

Census Block Conversion

Process to convert 1990 census blocks into their 2000 equivalents. All census blocks changed in 2000 from a three digit (with a possible one-letter extension) to a four digit numerical code.

Centroid

A centroid is the approximate center of a census block. Centroids are guaranteed to lie within the polygon, regardless of the polygon shape.

College

A public or private, postsecondary educational institution, including community colleges, which offers two-year or four-year educational programs.

Ethnicity

An ethnic classification or affiliation, pertaining to the basic divisions of mankind, as distinguished by customs, language, etc. As used by the U.S. Census Bureau for the context of data gathering, ethnicity is regarded as “Hispanic or Latino” and “not Hispanic or Latino.”

Geocode

A numerical code that uniquely identifies a specific geographic entity. For purposes of Kansas’ census adjustment, a 15-digit geocode was used to identify all participating addresses.

For example:

State	County	Tract	Block
20	123	4567.89	1023

Military Installation

Any facility under the control of the armed forces of the United States.

Military Personnel

Any person belonging to the armed forces of the United States, stationed and located in Kansas.

Nonresident

A person who has a domicile or permanent residence outside the state of Kansas.

Permanent Residence

A fixed place of abode, or fixed domicile, that represents a person's residence or to which a person presently intends to return.

Public Law 94-171

Enacted in 1975, this law directs the U.S. Census Bureau to make special preparations to provide redistricting data needed by the 50 states within a year of census day.

Race

The concept of race as used by the U.S. Census Bureau reflects self-identification by persons according to the race or races with which they most closely identify. These categories are sociopolitical constructs and should not be interpreted as being scientific or anthropological in nature.

Student

A person enrolled in classes of a university or college for a minimum of nine credit hours, or a person seeking an academic degree.

Technical College

A public or private institution that offers a two-year, educational, associate of arts and/or an associate of applied science degree program.

University

A public or private institution offering at least a baccalaureate degree.

DOCUMENTS

CONSTITUTION OF THE STATE OF KANSAS

Article 10. -- APPORTIONMENT OF THE LEGISLATURE

§ 1: Reapportionment of senatorial and representative districts. (a) At its regular session in 1989, the legislature shall by law reapportion the state representative districts, the state senatorial districts or both the state representative and senatorial districts upon the basis of the latest census of the inhabitants of the state taken by authority of chapter 61 of the 1987 Session Laws of Kansas. At its regular session in 1992, and at its regular session every tenth year thereafter, the legislature shall by law reapportion the state senatorial districts and representative districts on the basis of the population of the state as established by the most recent census of population taken and published by the United States bureau of the census. Senatorial and representative districts shall be reapportioned upon the basis of the population of the state adjusted:

(1) To exclude nonresident military personnel stationed within the state and nonresident students attending colleges and universities within the state; and

(2) to include military personnel stationed within the state who are residents of the state and students attending colleges and universities within the state who are residents of the state in the district of their permanent residence. Bills reapportioning legislative districts shall be published in the Kansas register immediately upon final passage and shall be effective for the next following election of legislators and thereafter until again reapportioned.

(b) Within 15 days after the publication of an act reapportioning the legislative districts within the time specified in (a), the attorney general shall petition the supreme court of the state to determine the validity thereof. The supreme court, within 30 days from the filing of the petition, shall enter its judgment. Should the supreme court determine that the reapportionment statute is invalid, the legislature shall enact a statute of reapportionment conforming to the judgment of the supreme court within 15 days.

(c) Upon enactment of a reapportionment to conform with a judgment under (b), the attorney general shall apply to the supreme court of the state to determine the validity thereof. The supreme court, within 10 days from the filing of such application, shall enter its judgment. Should the supreme court determine that the reapportionment statute is invalid, the legislature shall again enact a statute reapportioning the legislative districts in compliance with the direction of and conforming to the mandate of the supreme court within 15 days after entry thereof.

(d) Whenever a petition or application is filed under this section, the supreme court, in accordance with its rules, shall permit interested persons to present their views.

(e) A judgment of the supreme court of the state determining a reapportionment to be valid shall be final until the legislative districts are again reapportioned in accordance herewith.

KANSAS STATUTES ANNOTATED

Article 3.—CENSUS DATA FOR LEGISLATIVE AND CONGRESSIONAL REDISTRICTING

LEGISLATIVE REDISTRICTING

Cross References to Related Sections:

Reapportionment of districts, Kan. Const., art. 10 § 1.

Attorney General's Opinions:

Census data for reapportionment of senatorial and representative districts. 89-119

11-301. Census data for reapportionment of senatorial and representative districts; adjustment of federal census. In accordance with this act, the Secretary of State shall obtain data to make adjustments to each federal decennial census such that there is compliance with subsection (a) of section 1 of article 10 of the constitution of Kansas. The secretary shall make or cause to be made all such adjustments.

History: L. 1989, ch. 257, § 1; May 18.

Attorney General's Opinions:

Technical college granting associate degree is "college" under K.S.A. 11-302; residence of students must be collected for census purposes. 1999-60.

11-302. Same; definitions. For the purpose of determining the residence or nonresidence of military personnel stationed within the state and students attending colleges and universities within the state:

(a) "Nonresident" means a person who has a domicile or permanent residence outside of the state of Kansas.

(b) "Resident" means a person who declares that he or she is a resident of the state of Kansas and has a present intent to remain in the state.

(c) "Permanent residence" means a fixed place of abode or fixed domicile which a person intends to be such person's residence and to which such person presently intends to return.

(d) "Student" means a person enrolled in classes of a university or college for a minimum of nine credit hours, or a person seeking an academic degree.

(e) "Military personnel" means members of the armed forces of the United States stationed and located in Kansas.

(f) "College" means a public or private postsecondary educational institution, including community colleges, which offers two year or four year educational programs.

(g) "University" means a public or private institution offering at least a baccalaureate degree.

History: L. 1989, ch. 257, § 2; May 18.

Attorney General's Opinions:

Technical college granting associate degree is "college" under K.S.A. 11-302; residence of students must be collected for census purposes. 1999-60.

11-303. Same; information to be obtained by colleges and universities and certain military officers; reporting to secretary. (a) Every public or private university and college shall obtain from all enrolled students census information upon forms provided by the Secretary of State. Such information shall be obtained as of the federal census date as specified by the secretary and shall be used to carry out K.S.A. 11-301, and shall be supplied to the secretary at a time specified by the secretary. (b) Every military officer in charge of more than 50 persons in the military service shall obtain from all persons in the military service and under the command of such officer census information upon forms provided by the Secretary of State. Such information shall be obtained as of the federal census date as specified by the secretary and shall be used to carry out K.S.A. 11-301. Such information shall be supplied to the secretary at a time specified by the secretary.

History: L. 1989, ch. 257, § 3; May 18.

Attorney General's Opinions:

Census data; reapportionment of senatorial and representative districts; definitions. 89-141.

Technical college granting associate degree is "college" under K.S.A. 11-302; residence of students must be collected for census purposes. 1999-60.

11-304. Data used for legislative redistricting; adjustment. (a) The Secretary of State shall obtain decennial census information obtained by the United States bureau of the census for each county, city, precinct and part of a precinct that is given an identifying code. The Secretary of State shall adjust each piece of such information, and adjust each and all of the same in an organized manner to carry out the provisions of K.S.A. 11-301, and amendments thereto. When such information is so organized, the Secretary of State shall present the adjusted federal census information to the legislature, but not later than July 31 in the year following each federal decennial census. (b) The census information obtained by the Secretary of State for the purposes of subsection (a) shall be identical to the data from the actual enumeration conducted by the United States bureau of the census and used for the apportionment of representatives of the United States house of representatives. The Secretary of State shall not use bureau of the census counts derived by any other means, including the use of statistical sampling, to add or subtract population by inference.

History: L. 1989, ch. 257, § 4; L. 1999, ch. 148, § 1; July 1.

11-305. Same; rules and regulations. The Secretary of State shall adopt rules and regulations necessary for the determination of the residence or nonresidence of military personnel stationed within the state and students attending colleges and universities within the state of Kansas and determining the permanent residence of students and military personnel who are residents of the state of Kansas together with such other information required to carry out the provisions of this act. Such rules and regulations shall be adopted in accordance with the provisions of article 4 of chapter 77 of the Kansas Statutes Annotated, and amendments thereto.

History: L. 1989, ch. 257, § 5; May 18.

11-306. Same; personal data and information, use; confidential and not subject to open records act. All forms and other personally identifiable data and information obtained by the Secretary of State, or by officials of a university or college or a military officer to carry out this act or any part thereof shall be confidential and shall not be subject to the open records act, and shall be used solely and exclusively to make the adjustments required under K.S.A. 11-301 and 11-304 as contemplated by the constitution of Kansas.

History: L. 1989, ch. 257, § 6; May 18.

11-307. Same; unlawful acts; informing public. Any person or public or private entity who shall impair, impede, obstruct or otherwise interfere with the Secretary of State or any student, college, university, or with any member of the military services or any military installation in carrying out the provisions of this act shall be guilty of a class A misdemeanor. Nothing in this section shall be construed to limit or prohibit any person or any public or private entity from engaging in any activity intended to inform the public or any portion of the public of means whereby persons may assure or attempt to assure their qualification to be determined a resident or to have a permanent residence at any particular place.

History: L. 1989, ch. 257, § 7; May 18.

KANSAS ADMINISTRATIVE REGULATIONS

Article 35. – Census Adjustment

7-35-1. Adjustment of federal census data. Before July 31 of the year following the federal decennial census, responses from student and military questionnaires shall be used by the Secretary of State to compute the number of persons to be added to or subtracted from each election precinct's population totals from the decennial census conducted by the U.S. bureau of the census. (Authorized by K.S.A. 11-305; implementing Article 10, Section 1 of the Kansas Constitution and K.S.A. 11-303; effective Dec. 11, 1989; amended, T- 7-9-13-99, September 13, 1999; amended

7-35-2. Questionnaires. Questionnaires for all students enrolled at a college or university in the state of Kansas; and for military personnel stationed and located in the state of Kansas during the decennial census year shall be provided by the Secretary of State. Completed questionnaires shall be returned by college and university officials and military officers to the Secretary of State before June 1 of the decennial census year. (a) The questionnaires shall require each college or university student and each military person to provide all information deemed necessary by the Secretary of State to determine the person's residency for the purpose of conducting the census adjustment. The questionnaires shall also provide for racial and ethnic information similar to that provided on the federal census questionnaire.

(b) If the military person has already completed a decennial census adjustment questionnaire as a student at a Kansas college or university, the person shall state the name of that college or university.

(c) In cases in which individual military personnel are unavailable to fill out their questionnaires on April 1 because their military duties require them to be temporarily absent from the installation to which they are assigned, the military officer responsible for providing census adjustment data to the Secretary of State may provide these persons with an opportunity to complete their questionnaires at some time after April 1 but not later than May 1.

(d) Each college or university in Kansas shall provide to the Secretary of State a list of names and addresses of all students enrolled during the spring semester of the decennial census year. Every military officer in charge of more than 50 persons in the military service shall provide to the Secretary of State a list of names and addresses of all military personnel under that officer's command on April 1 of the decennial census year. The lists shall not be used to determine the permanent residence of any individual.

(e) Questionnaires shall be distributed to all college and university students enrolled for the spring semester of the decennial census year by officials at each institution who shall be designated by their respective administrators. Questionnaires shall be distributed to all military personnel by officers who shall be designated by their respective administrators. The questionnaires shall be completed on or after April 1 whenever possible, to coincide with the official census date of the U.S. bureau of the census, or at another time that is administratively expedient but not later than May 1. (Authorized by K.S.A. 11-305; implementing Article 10, Section 1 of the Kansas Constitution and K.S.A. 11-303; effective Dec. 11, 1989; amended, T - 7-9-13-99, September 13, 1999.)

ATTORNEY GENERAL OPINION 89-119

Office of the Attorney General
State of Kansas

September 21, 1989

Opinion No. 89-119

The Honorable Bill Graves
Secretary of State
2nd Floor
State Capitol
Topeka, Kansas 66612

Re: Census--Census Data for Reapportionment of Senatorial and Representative Districts--
Definitions

Synopsis: L. 1989, ch. 257 requires the Secretary of State to obtain data to make specified adjustments to the federal decennial census. The provisions of L. 1989, ch. 257 dealing with residency of college students are applicable to all individuals who are enrolled in nine or more credit hours and to all individuals seeking an academic degree at a university or college. The act does not apply to those individuals not seeking an academic degree who are enrolled in fewer than nine credit hours and those individuals attending a proprietary school or vocational-technical school. Cited herein: K.S.A. 72-4919; K.S.A. 1988 Supp. 72-4412; L. 1989, ch. 257.

* * *

Dear Secretary Graves:

You request our opinion regarding an interpretation of certain terms in L. 1989, ch. 257. Specifically you question whether the provisions of L. 1989, ch. 257 are applicable to those individuals attending a proprietary school or vocational-technical school. You also question whether a high school student enrolled for college credit or an individual enrolled in continuing education courses falls within the act.

"College" is defined in L. 1989, ch. 257, § 2 as "a public or private postsecondary educational institution, including community colleges, which offers two year or four year educational programs." Two factors of this definition work to exclude proprietary schools and vocational-technical schools from application of the provisions of L. 1989, ch. 257. First, the legislature concentrated on the educational aspects of an institution to bring it within the definition. Second, by expressly including community colleges within the definition, proprietary schools and vocational-technical schools were impliedly excluded.

A proprietary school is defined in K.S.A. 72-4919(a) as "any business enterprise operated for a profit, or on a nonprofit basis, which maintains a place of business within the state of Kansas, or solicits business within the state of Kansas, and which is not specifically exempted by the provisions of this act...." (Emphasis added.) Although proprietary schools offer and

maintain courses of instruction or study, these courses do not include the educational diversity generally associated with a college course of study. Because a proprietary school lacks the educational feature of a college, proprietary schools are not included in the definition of "college" in L. 1989, ch. 257, § 2.

The goal of vocational education is to "prepare individuals for gainful employment as semi-skilled or skilled workers or technicians or subprofessionals ... or to prepare individuals for enrollment in advanced technical education programs ..." through vocational or technical training or retraining. K.S.A. 1988 Supp. 72-4412. Vocational-technical schools do not provide the education necessary in acquiring baccalaureate or higher degrees or for preparation for employment in professional occupations. Vocational-technical schools provide training rather than education, and therefore are distinguishable from "college" as defined in L. 1989, ch. 257, § 2.

The maxim *expressio unius est exclusio alterius* also works to exclude proprietary schools and vocational-technical schools from the definition of "college" under L. 1989, ch. 257, § 2. The maxim provides that the express mention of one matter excludes other similar matters not mentioned. 82 C.J.S. Statutes § 333, p. 668. By expressly including community colleges in the definition of "college", the legislature impliedly excluded proprietary schools and vocational-technical schools.

The purpose of L. 1989, ch. 257 is to assist in adjusting the census through a determination of the residency of students. Therefore, the term "student" should be liberally construed to include all individuals enrolled in nine or more credit hours and all individuals seeking an academic degree. The determination of whether an individual is seeking an academic degree is purely subjective and could, therefore include high school students enrolled in college-level courses. It is not necessary for individuals seeking an academic degree to be enrolled in nine or more credit hours to fall under the provisions of L. 1989, ch. 257. Individuals enrolled in less than nine hours of continuing education courses do not fall within the definition of "student" as they are deemed to have already received their academic degree. Taking into consideration the purpose of the act, the only individuals not included in the definition of "student" are those enrolled in fewer than nine credit hours who are not seeking an academic degree.

Very truly yours,

Robert T. Stephan

Attorney General of Kansas

Richard D. Smith

Assistant Attorney General

ATTORNEY GENERAL OPINION 89-141

Office of the Attorney General
State of Kansas

December 6, 1989

Opinion No. 89-141

The Honorable Bill Graves
Secretary of State
2nd Floor
State Capitol
Topeka, Kansas 66612-1594

Re: Census--Census Data for Reapportionment of Senatorial and Representative Districts--
Definitions

Synopsis: The purpose of L.1989, ch. 257, is to facilitate adjustment of census figures supplied by the federal census bureau. Pursuant to Art. 10, § 1 of the Kansas Constitution, those census figures are to be adjusted to more accurately reflect the residence of students "attending" colleges or universities. Because individuals enrolled in off-campus courses are not "attending" a college or university they are not required to complete the census data cards distributed pursuant to L.1989, ch. 257, § 3. Cited herein: L.1989, ch. 257; Kan. Const., Art. 10, § 1.

* * *

Dear Mr. Graves:

You request our opinion regarding the distribution of census data cards to college and university students. Specifically, you ask whether those individuals attending college and university classes in their home communities rather than on-campus are required to complete census data cards.

The constitution of the state of Kansas requires that senatorial and representative districts be reapportioned upon the basis of the population of the state as established by the latest published federal census, "adjusted: (1) to exclude ... nonresident students attending colleges and universities within the state; and (2) to include ... students attending colleges and universities within the state who are residents of the state in the district of their permanent residence." (Emphasis added) Kan. Const., Art. 10, § 1. The language of a constitutional provision should be interpreted to mean what the words imply to men of common understanding. *State ex rel. Frizzell v. Highwood Service, Inc.*, 205 Kan. 821. "Attend" is defined in the Merriam-Webster Dictionary, p. 59 (1974) as "to be present at." Therefore, the Constitution does not require that adjustments be made as to those individuals taking college-level classes who are not present at a college or university.

Further, in determining the intent of the legislature, it is proper to consider the purpose to be accomplished by the legislation. *Tilley v. Keller Trade and Implement Corp.*, 200 Kan. 641 (1968). The purpose of L.1989, ch. 257 is to collect data regarding the residence or nonresidence of those individuals whose residence is subject to adjustment. Therefore, data regarding

residence or nonresidence is to be collected from those students attending classes at a college or university. Because students enrolled in correspondence courses are not "attending" the college or university, such individuals are not required to complete the census data cards distributed pursuant to L.1989, ch. 257, § 3.

Very truly yours,

Robert T. Stephan

Attorney General of Kansas

Richard D. Smith

Assistant Attorney General

ATTORNEY GENERAL OPINION 99-60

Office of the Attorney General
State of Kansas

November 3, 1999

Opinion No. 99-60

The Honorable Ron Thornburgh
Secretary of State
State Capitol, 2nd Floor
300 S.W. 10th Avenue
Topeka, Kansas 66612-1594

Re: Census--Census Data for Reapportionment of Senatorial and Representative Districts--
Census Data for Reapportionment of Senatorial and Representative Districts; Adjustment of
Federal Census; Definitions; Student; College; University

Synopsis: A proprietary school is not included in the definitions of "college" and "university" set forth in K.S.A. 11-302. None of the institutions which provide vocational and technical education offer a baccalaureate degree and, therefore, none meet the definition of "university" in K.S.A. 11-302. An area vocational school or area vocational-technical school which does not offer two year or four year educational programs is not included in the definition of "college" set forth in K.S.A. 11-302. A technical college may offer an associate of applied science degree program which is a two year educational program. As a postsecondary educational institution which offers a two year educational program, a technical college is a "college" under K.S.A. 11-302. Thus, data regarding the residence of students of a technical college must be collected so the proper adjustments to the census may be made. Cited herein: K.S.A. 11-301; 11-302; 11-303; 71-1701; K.S.A. 1998 Supp. 72-4412, as amended by L. 1999, Ch. 147, § 101; K.S.A. 72-4416, as amended by L. 1999, Ch. 147, § 102; K.S.A. 1998 Supp. 72-4468; 72-4470; 72-4472; 72-4473; 72-4474; 72-4475; 72-4919, as amended by L. 1999, Ch. 147, § 121; L. 1999, Ch. 147, §§ 20, 21, 22; Kan. Const., Art. 10, § 1; K.A.R. 88-16-1a; 91-8-17; L. 1998, Ch. 171, § 11; L. 1994, Ch. 246, §§ 1, 2, 4; L. 1992, Ch. 248, § 1; L. 1986, Ch. 267, § 3; L. 1971, Ch. 228, § 1.

Dear Secretary of State Thornburgh:

You request our opinion regarding adjustments which are to be made to the Federal census for the purpose of reapportioning the State senatorial and representative districts. Specifically, you ask whether data regarding the residence of students enrolled in proprietary schools and vocational-technical schools are to be obtained pursuant to K.S.A. 11-301 et seq. Your request involves reconsideration of Attorney General Opinion No. 89-119.

Section 1 of Article 10 of the Kansas Constitution states in part:

"At its regular session in 1992, and at its regular session every ten years thereafter, the legislature shall by law reapportion the state senatorial districts and representative districts on the basis of the population of the state as established by the most recent census of population taken and published by the United States bureau of the census. Senatorial and

representative districts shall be reapportioned upon the basis of the population of the state adjusted: (1) To exclude nonresident military personnel stationed within the state and nonresident students attending colleges and universities within the state; and (2) to include military personnel stationed within the state who are residents of the state and students attending colleges and universities within the state who are residents of the state in the district of their permanent residence."

Pursuant to K.S.A. 11-301, the Secretary of State is obligated to "obtain data to make adjustments to each federal decennial census such that there is compliance with subsection (a) of section 1 of article 10 of the constitution of Kansas." Data regarding the residence of students enrolled in every public or private university and college are collected through forms provided by the Secretary of State and distributed by the public and private universities and colleges in the State.

In Attorney General Opinion No. 89-119, it was determined that proprietary schools and vocational-technical schools were not included within the definition of "college" or "university" set forth in K.S.A. 11-302. The conclusion was based in part on definitions of "proprietary school" and "vocational-technical school" provided in Chapter 72 of the Kansas Statutes Annotated at the time the opinion was issued. The definitions indicated that the goal of proprietary schools and vocational-technical schools was to provide training, and that such institutions lacked the educational diversity associated with colleges and universities. Proprietary schools and vocational-technical schools, therefore, were not required to obtain information regarding the residence of students enrolled in proprietary schools and vocational-technical schools. The definitions of "college" and "university" set forth in K.S.A. 11-302 have remained unchanged. However, the statutes in Chapter 72 which contain the definitions of "proprietary school" and "vocational-technical school" have been amended since issuance of Attorney General Opinion No. 89-119.

Definitions used for determining the residence or nonresidence of students attending colleges and universities within the State are set forth in K.S.A. 11-302. The statute states in part:

"(d) 'Student' means a person enrolled in classes of a university or college for a minimum of nine credit hours, or a person seeking an academic degree.

....

"(f) 'College' means a public or private postsecondary educational institution, including community colleges, which offers two year or four year educational programs.

"(g) 'University' means a public or private institution offering at least a baccalaureate degree."

"[T]he fundamental rule of statutory interpretation is that the intent of the legislature, where it can be ascertained, governs the construction of the statute, and it is the function of the court to interpret a statute to give it the effect intended by the legislature." "A statute must be interpreted in the context in which it was enacted and in light of the legislature's intent at that time." Because the definitions provided in K.S.A. 11-302 have not been amended since their original enactment, the intent of the Legislature remains the same -- to exclude from the definitions of

"college" and "university" those institutions which do not possess the educational diversity and offer the educational programs associated with colleges and universities.

The role of various types of postsecondary institutions has been modified since issuance of Attorney General Opinion No. 89-119. The most recent change has been achieved through enactment of the Kansas Higher Education Coordination Act. Under the Act, supervision of community colleges, technical colleges, area vocational schools, area vocational-technical schools, and proprietary schools was transferred from the State Board of Education to the State Board of Regents. Given the change in the role of the various postsecondary institutions, it is necessary to review the role of each type of institution to determine whether the institution possesses the educational diversity and offers the educational programs associated with colleges and universities. If so, the institution would be included within the definition of "college" or "university" set forth in K.S.A. 11-302.

The definition of "proprietary school" has been amended once since issuance of Attorney General Opinion 89-119.

"(a) 'Proprietary school' or 'school' means any business enterprise, whether operated for on a profit, or on a nonprofit not for profit basis, which:

"(1) Maintains a place of business within the state of Kansas, or solicits business within the state of Kansas, and which;

"(2) is not specifically exempted by the provisions of this act; and

"(1) which (3) offers or maintains a course or courses of instruction or study; or (2) at which place of business such a course or courses of instruction or study is available through classroom instruction contact or by correspondence, or by both, to a person or persons for the purpose of training or preparing such person persons for a field of endeavor in a business, trade, technical, or industrial occupation, or for avocational or personal improvement, except as hereinafter excluded."

The amendment was not substantive regarding the function or role of a proprietary school. A proprietary school continues to be an institution focused on providing training rather than offering educational programs. Therefore, a proprietary school is not included in the definitions of "college" and "university" set forth in K.S.A. 11-302.

Statutes regarding the role of vocational and technical education, however, have undergone extensive amendment since issuance of Attorney General Opinion No. 89-119. In 1992, the Legislature enacted K.S.A. 71-1701 et seq. The legislation provided in part that "[a]ny area vocational school or area vocational-technical school may consolidate with and be made a part of any community college. . . ."

Two years later, the focus of vocational education was changed from "vocational or technical training or retraining" to "organized educational programs offering a sequence of courses which are directly related to the preparation of individuals in paid or unpaid employment in current or emerging occupations requiring other than a baccalaureate or advanced degree." Vocational education was deemed to include technological education. Under the legislation, "[a]n area vocational school or an area vocational-technical school may be converted to,

established as, and officially designated a technical college. . . ." A technical college was granted the authority "to confer the associate of applied science degree upon students who successfully complete an associate of applied science degree program of the college and to award a certificate or diploma to students who successfully complete a vocational education program of the college." In order to be awarded an associate of applied science degree, a person must satisfactorily complete a minimum of 60 semester credit hours. At least four area vocational schools and area vocational-technical schools have been converted to technical colleges.

Since issuance of Attorney General Opinion No. 89-119, vocational and technical education has evolved from focusing solely on training or retraining to providing organized educational programs. None of the institutions which provide vocational and technical education offer at least a baccalaureate degree and, therefore, none meet the definition of "university" in K.S.A. 11-302. In order to be included within the definition of "college" set forth in K.S.A. 11-302, the institution must offer two year or four year educational programs. After reviewing the programs offered by area vocational schools and area vocational-technical schools, it appears such institutions continue to concentrate on providing training through educational programs which are completed in less than two years. An area vocational school or area vocational-technical school which does not offer two year educational programs is not included in the definition of "college" set forth in K.S.A. 11-302. A technical college, however, may offer an associate of applied science degree program which is a two year educational program. As a postsecondary educational institution which offers a two year educational program, a technical college is a "college" under K.S.A. 11-302. Thus, data regarding the residence of students of a technical college must be collected so the proper amendments to the census may be made.

Very truly yours,

Carla J. Stovall

2000 ADJUSTMENT QUESTIONNAIRE: STUDENT

	State of Kansas 2000 Census Adjustment Student Questionnaire
---	---

The Kansas Constitution requires that, for purposes of representation in the State Legislature, college students be counted at their permanent residences. This requires the 2000 federal census population figures to be adjusted based on your response. **State law requires that you provide this information. All information will be kept strictly confidential.** Residency information provided on this form will **NOT** affect your college mailing address, tuition, income tax rates, or voting location. Thank you for your help.

DEFINITIONS

(K.S.A. 11-301 et seq.)

STUDENT means a person enrolled in classes of a university or college for a minimum of nine credit hours, or a person seeking an academic degree.

PERMANENT RESIDENCE means a fixed place of abode or fixed domicile which a person intends to be such person's residence and to which such person presently intends to return.

RESIDENT means a person who declares that he or she is a resident of the state of Kansas and has a present intent to remain in the state.

NONRESIDENT means a person who has a domicile or permanent residence outside the state of Kansas.

If you have a question, call the Kansas Secretary of State's office at 1-800-262-VOTE.

2000 ADJUSTMENT QUESTIONNAIRE: MILITARY

	Official State Business	State of Kansas 2000 Census Adjustment Military Questionnaire
---	----------------------------	--

The Kansas Constitution requires that, for purposes of representation in the State Legislature, military personnel be counted at their permanent residences. This requires the 2000 federal census population figures to be adjusted based on your response. **State law requires that you provide this information. All information will be kept strictly confidential.** Residency information provided on this form will not affect your mailing address, income tax rates, or voting location. Thank you for your help.

DEFINITIONS

(K.S.A. 11-301 et seq.)

MILITARY PERSONNEL means members of the armed forces of the United States stationed and located in Kansas.

PERMANENT RESIDENCE means a fixed place of abode or fixed domicile which a person intends to be such person's residence and to which such person presently intends to return.

RESIDENT means a person who declares that he or she is a resident of the state of Kansas and has a present intent to remain in the state.

NONRESIDENT means a person who has a domicile or permanent residence outside the state of Kansas.

If you have a question, call the Kansas Secretary of State's office at 1-800-282-VOTE.
