**Notice of Hearing**

A public hearing will be conducted at 9:00 a.m. Thursday, May 30, 2019, in the offices of the Kansas Development Finance Authority (KDFA), 534 S. Kansas Ave., Suite 800, Topeka, Kansas, on the proposal for the KDFA to issue its Agricultural Development Revenue Bonds for the projects numbered below in the respective maximum principal amounts. The bonds will be issued to assist the borrowers named below (who will be the owners and operators of the projects) to finance the cost in the amount of the bonds, which are then typically purchased by a lender bank who then, through the KDFA, loans the bond proceeds to the borrower for the purposes of acquiring the project. The projects shall be located as shown:

**Project No. 001030**

**Maximum Principal Amount:** $275,000. **Owner/Operator:** Kyle J. Becker; **Description:** Acquisition of 117 acres of agricultural land and related improvements and equipment to be used by the owner/operator for farming purposes (the “Project”). The Project is being financed by the Lender for Kyle J. Becker (the “Beginning Farmer”) and is located at Section 36, Washington Township, Brown County, Kansas, approximately 4 miles east of Everest, Kansas on Hwy. K-20 and 1.5 miles south on Willow Road.

**Project No. 001035**

**Maximum Principal Amount:** $126,000. **Owner/Operator:** Tyler and Felicia Johnson; **Description:** Acquisition of 33.29 acres of agricultural land and related improvements and equipment to be used by the owner/operator for farming purposes (the “Project”). The Project is being financed by the Lender for Tyler and Felicia Johnson (the “Beginning Farmer”) and is located at Section 7, Township 20, Range 2 West, McPherson County, Kansas, approximately 2 miles west and 4 miles south of Galva, Kansas.

The bonds, when issued, will be a limited obligation of the KDFA and will not constitute a general obligation or indebtedness of the state of Kansas or any political subdivision thereof, including the KDFA, nor will they be an indebtedness for which the faith and credit and taxing powers of the state of Kansas are pledged. The bonds will be payable solely from amounts received from the respective borrower, the obligation of which will be sufficient to pay the principal of, interest and redemption premium, if any, on the bonds when they become due.

All individuals who appear at the hearing will be given an opportunity to express their views concerning the proposal to issue the bonds to finance the projects, and all written comments previously filed with the KDFA at its offices at 534 S. Kansas Ave., Suite 800, Topeka, KS 66603, will be considered. Additional information regarding the projects may be obtained by contacting the KDFA.

**Notice to Consulting Firms**

(Note: This advertisement replaces the previous advertisement which was due on April 22, 2019. The advertisement has been revised to indicate up to five contracts will be awarded.)

The Kansas Department of Transportation (KDOT) is seeking the services of a consultant firm to provide Engineering Design Services in the areas of Traffic Control Analysis and Design.

KDOT intends to award up to five on-call contracts. Services may not be required on a constant, continuous basis but rather on an as-needed basis during the term of the contract. Individual work orders will be negotiated and issued. KDOT is not obligated for services until a work order is issued. Consultants currently under an on-call agreement with KDOT are eligible to respond to this advertisement.

(continued)
Requirements

Interested consulting firms must: (a) be prequalified by KDOT in category 231–Traffic Control Analysis and Design and (b) submit a Letter of Interest on or before close of business May 28, 2019, to David Lutgen, Contracts Engineer for KDOT, by email to kdot.designcontracts@ks.gov with subject line reading “Traffic Engineering On-Call – [Firm Name].” Letters of interest in the form of a PDF document (maximum size 4 pages) should express interest in the project and describe qualifications for the professional services sought by KDOT, including any special expertise, skill, and experience or knowledge of the firm. Include previous project experience in the area of traffic control analysis and design. If a firm is not currently prequalified by KDOT but is interested in obtaining prequalification, then please view the requirements and categories at http://www.ksdot.org/divengdes/prequal/default.asp. All firms doing business with KDOT must be registered and in good standing under the laws of the State of Kansas and comply with applicable state and federal laws, rules and regulations.

Qualification-Based Selection Process

Based on the qualifications submitted in the Letter of Interest and other information available to KDOT, on or about June 3, 2019, KDOT will shortlist up to ten firms and notify all firms submitting Letters of Interest of the names of the shortlisted firms by return email. Thereafter, KDOT will issue a Request for Proposal (RFP) to the shortlisted firms soliciting a technical proposal. Shortlisted firms will also be interviewed in person, tentatively scheduled for June 19, 2019. KDOT will select up to five firms to enter negotiations with to provide Traffic Engineering Design services. In the event KDOT cannot reach agreement with these firms, it will terminate negotiations with such firm and commence negotiations with the next highest ranked firm, and so on, until either agreement is reached for a fair and reasonable price, or KDOT decides to pursue other alternatives.

Please do not call or write KDOT staff for information regarding the services in this RFQ. Email all inquiries/questions to kdot.designcontracts@ks.gov.

Legal Description: SE¼, S29, T19S, R3W, McPherson County, Kansas
Facility Name: Water Treatment Air Stripping Unit
Facility Location: 414 W. Elizabeth, McPherson, KS 67460

The proposed action is to reissue an existing State/NPDES permit for an existing facility. This is an air stripper facility designed to remove volatile organic chemicals (VOC’s) from groundwater prior to placement in the City of McPherson potable water system. The treatment facility is comprised of two air-stripper towers, which treat groundwater from Wells #2, #3 and #5. The effluent is then pumped to the Blending Plant facility, where it is mixed with the effluent from the City’s other municipal wells. The effluent is disinfected with chlorine gas being discharged into the Blending Plant clear well and prior to entry into the City’s public water supply. Water is no longer chlorinated at the air stripper facility, therefore, there would no longer be a discharge of treated effluent to the storm sewer. The proposed permit contains limits for total residual chlorine, trichloroethylene, tetrachloroethylene, and pH, as well as monitoring for flow, chlorides, and selenium.

Persons wishing to comment on the draft documents and/or permit applications must submit their comments in writing to the Kansas Department of Health and Environment if they wish to have the comments considered in the decision-making process. Comments should be submitted to the attention of the Livestock Waste Management Section for agricultural related draft documents or applications, or to the Technical Services Section for all other permits, at the Kansas Department of Health and Environment, Division of Environment, Bureau of Water, 1000 SW Jackson St., Suite 420, Topeka, KS 66612-1367.

All comments regarding the draft documents or application notices received on or before June 15, 2019, will be considered in the formulation of the final determinations regarding this public notice. Please refer to the appropriate Kansas document number (KS-AG-19-174/184, KS-Q-19-112/113) and name of the applicant/permittee when preparing comments.

After review of any comments received during the public notice period, the Secretary of Health and Environment will issue a determination regarding final agency action on each draft document/application. If response to any draft document/application indicates significant public interest, a public hearing may be held in conformance with K.A.R. 28-16-61 (28-46-21 for UIC).

The proposed action is to reissue an existing State/NPDES permit for an existing facility. This is a zeolite production facility, which is primarily used in the water conditioning industry. This facility usually only operates from May through October of each year. When a discharge occurs, it consists of wash water that has been settled and pH neutralized. The proposed permit contains limits for pH and total suspended solids, as well as monitoring for flow, chlorides, and selenium.

(4) The person holding the water race or drag event shall notify the department at least 10 days before the event and provide a description of the event to be conducted. This notification deadline may be waived by the secretary for extenuating circumstances. “Extenuating circumstances” shall mean any condition that is caused by an unexpected event that is beyond the applicant’s control. (Authorized by and implementing K.S.A. 2018 Supp. 32-807 and 32-954; effective Aug. 5, 1991; amended Sept. 27, 2002; amended May 31, 2019.)
