**Anticipated Consultant Scope**

The KDOT anticipates the following to be included in the consultant’s scope: Transportation Management Plan (TMP) management services during all phases and stages of construction operations necessary to complete this project. The TMP has already been developed since this project has been deemed a significant project. The TMP documents mobility and safety metrics to be measured and recorded throughout construction. Additionally, it

includes information on what traffic control scenarios were considered and the anticipated impacts on the work zones and surrounding areas. The TMP's ultimate goal is to create a safer work zone and understand construction's impacts to safety and mobility on the surrounding roadway network. The TMP (linked below) includes specific goals for this project.

The TMP Management Services During Construction manager/team must be capable of performing in-field reviews/measurements of traffic queues, travel times, and signal operations as well as performing desktop peak hour daily reviews/measurements of traffic queues, travel times, and safety performance measures. The key metrics to be measured are outlined in the document "Transportation Management Plan, Gold Phase 2B", dated June 2022 which is available here at <https://bit.ly/KDOT-TMP-GoldPh2B>. This document is referred to herein as both "Gold Project TMP" and "TMP".

KDOT draws specific attention to the following sections of the TMP:

- Section 5: TMP Activity During Construction (pages 36-38) This section provides guidance on types of data collection, frequency of data of collection, and definitions.
- Attachment A – Mobility Goals and definition of Event for key areas
- Attachment B – Safety Goals.

There are three key categories of activities which the TMP Management Services During Construction consultant shall be responsible for executing: data collection; documentation; and communication (via meetings, memos, and reports). KDOT's expectations for each are described below:

#### Data Collection

- In addition to measurement requirements noted in the TMP, field and desktop measurements and observations shall be collected during all Initial Periods during a single nighttime period.
- Desktop (including mobility, safety, and incident clearance) and field measurements shall be collected in accordance with the measurement collection scenarios as outlined in the TMP in Section 5 (pages 36-38).
- Field measurements shall be collected for all corridors identified within the "Location" column found in Attachment A (starting on page 47) of the Gold Project TMP. Additional corridors may be identified during scope negotiation.
- Field measurements shall include but are not limited to travel times, queue lengths, and number of signal cycles to clear an intersection during the peak period and shall be documented with photos/videos.
- Desktop measurements and observations shall be either screen captures or video recordings collected in 15-minute intervals during the peak hour. These measurements can be accomplished utilizing a tool such as Google Maps Traffic, WICHway cameras, other mapping/traffic software/website, contractor provided ITS equipment (if available), or other third-party ITS equipment as provided by the TMP Manager Team.

- Incident clearance times information shall be gathered from WICHway by the TMP Manager.
- Safety data measurements shall include coordination by the TMP Manager with WICHway and/or Highway Patrol and/or local law enforcement. This ensures the safety data analysis includes crashes on the construction routes and detours.
- For the safety measurements, severe and fatal crashes shall be reviewed within 48 hours of receiving the crash report. This review shall include a memo summarizing the crash, how the crash was influenced by the project and any recommendations to minimize future crashes.

#### Documentation

- Field review information, photo logs and/or video logs shall be kept and stored for submission to KDOT upon request. The field reviews and logs shall include the collector's name, location, direction, date, time, weather, and vehicle type.
- For desktop review information, screenshots or videos of traffic conditions, the collector's name, data source, date, time, weather, and location shall be included. This information shall be stored for submission to KDOT upon request.
- For review of safety data, a log of crash types, severity, date, and location of crashes shall be kept and stored for submission to KDOT upon request and to facilitate ongoing trend analysis.
- For review of incident management clearance times, a log of date, time, and time to clear shall be kept and stored for submission to KDOT upon request and to facilitate ongoing trends analysis.

#### Communication (Meetings, Memos, and Reports)

- Meetings between the TMP Manager and the Construction Team shall be conducted on a weekly basis to facilitate maintaining safe and mobile work zones. These meetings shall include TMP Manager reports on safety, mobility, and incident management goals and trends.
- Memos shall be submitted at a frequency determined by the measurement collection scenario as outlined in Section 5.
- At a minimum, memos shall include information on the data collected, any observations that are critical to maintaining safety and satisfactory mobility, recommendations, and mitigation alternatives analysis. They shall also include consistently reported metrics for safety, mobility, and incident management to enable quick identification of trends.
- The final lessons learned report shall detail all phases, the "Events" that occurred, trends in mobility and safety, recommendations on what worked well, and improvements that could be made on future projects. The report shall also contain a full area, as previously studied in Section 4.3 of the TMP, safety review for the duration of construction.
- All memos and reports shall be submitted to KDOT in PDF format.

*(continued)*

These expectations may not be fully inclusive. A scoping meeting will be held with the selected consultant to kick off the negotiation phase.

The selected consultant shall provide the measurement reporting timelines and deliverables as further detailed below:

### TMP Monitoring

- Field Measurements/Observations – Record queues at signals/ramps/work zone, travel time runs, and signal operations.
- Desktop Measurements/Observations – Measure traffic queues, travel times, and safety performance measures at the significant intersections of the project.
- Measurements shall be taken both in the field and at desktop level starting when temporary traffic control devices are placed in the field at the start of a project or the start of a change of construction phase. Measurements shall be collected during both the A.M. and P.M. peak periods (typically 7:00 to 9:00 a.m. and 4:00 to 6:00 p.m.) for the following progressive scenarios:
  - Prior to start of construction activities – Measure A.M. and P.M. peak hour travel times with field and desktop measurements and observations for three (3) weekdays prior to construction beginning.
  - Prior to implementation of a new long-term traffic control configuration/traffic switch – Measure A.M. and P.M. peak hour travel times with field and desktop measurements and observations for three (3) weekdays in advance. At least one field travel time run should be completed during each peak hour for each route with an upcoming traffic switch. If a currently implemented traffic control configuration is affecting travel times, supplement these measurements with previously collected travel times prior to any traffic switch. A memo shall document the travel times collected and any potential issues the TMP manager anticipates.
  - Initial Period, or the first three (3) calendar days, measure in the A.M. and P.M. peak hour with both field and desktop measurements and observations. Submit a Preliminary report on the observations within 24 hours of the observed peak hour.
  - Stabilizing Period, or the two (2) weeks immediately following the Initial Period, measure in the A.M. and P.M. peak hour with desktop measurements. Preliminary reports shall be provided within 48 hours of measurements.
  - Remaining Period, or the remaining duration of the phase of construction after the Stabilizing Period, measure the A.M. and P.M. peak hours via desktop review. Preliminary reporting of the metrics shall be within one (1) week of the data collected.
- Safety metrics shall be tracked on a weekly basis and updated with information as it is available.
  - If serious injury or fatal crash occurs, a review of the crash report and reporting of the crash shall occur as noted in Data Collection section above.
  - Incident Clearance times shall be reported on a weekly basis.

### After an Event

- An “Event” is defined as when a threshold at a monitored location, as defined in the TMP, is exceeded. An “Event” could also be an unanticipated condition that is deemed to be unsafe or results in excessive congestion or delays.
- If an Event occurs, measurements shall follow procedures described in the Initial Period until the Event is resolved. After the Initial Period, measurement procedures shall continue through the Stabilizing Period and return to the Remaining Period.
- The TMP Manager shall, within two (2) calendar days of an Event, propose to KDOT a plan of action. The plan of action shall include additional data collection needed and plan for use of the data. The plan shall also include a schedule for determining and implementing the final solution if it is determined to be necessary.

### Deliverables

- Preliminary reporting on performance against the goal shall follow the deliverable schedule shown in the TMP Monitoring section. These shall be in the form of a memo/short presentation to the project team.
- At the conclusion of each construction season and/or project, a report that breaks out the metrics documented and the mitigation measures implemented for each phase shall be provided. This document shall include the higher scale goals and metrics such as crash rates/numbers and travel time increases. The final conclusion of the report shall provide lessons learned.

### Anticipated Schedule and Key Dates

1. Proposals are due by or before 12:00 p.m. (CDT) July 13, 2022
2. Important dates:
  - a. Letting: September 21, 2022
  - b. Notice of Acceptance: December 13, 2023

### Instructions for Proposal

1. No cost or pricing information shall be submitted with the proposal. Proposals including cost or pricing information will be considered non-responsive and withdrawn from further consideration.
2. The consultant’s proposal must not exceed 6 pages total (including any cover letter, index, etc.). All pages shall be standard letter size (8.5” x 11”). Any page larger than standard letter size will be counted as two or more pages depending on size.

**Notice of Hearing on Proposed Administrative Regulation**

A public hearing will be conducted at 9:00 a.m. Monday, August 22, 2022, at the Kansas Real Estate Commission, 700 SW Jackson, Suite 404, Topeka, KS 66603, regarding the amendment of K.A.R. 86-1-5 of the Kansas Real Estate Commission, on a permanent basis. The proposed amendment to K.A.R. 86-1-5 removes the fee to change the affiliation of a Kansas real estate license, clarifies language related to fees for submission of applicant fingerprints to the KBI and increases the fee for submitting an individual education course approval request from \$10 to \$20 per course. Adopting this amended regulation will result in the Commission collecting \$29,000 less in fees annually. This represents 2% of the total fees collected by the Commission. The affiliation change fee being eliminated will reduce revenues by \$30,000 annually. The fee increase for individual education course of instruction approvals will increase revenue by \$1,000 annually.

This 60-day notice of the public hearing shall constitute a public comment period for receiving written public comments on the proposed regulation. All interested parties may submit written comments prior to the hearing to the Kansas Real Estate Commission, 700 SW Jackson, Suite 404, Topeka, KS 66603 or by email to [erik.wisner@ks.gov](mailto:erik.wisner@ks.gov).

All interested parties will be given a reasonable opportunity to present their views orally regarding the adoption of the proposed regulation during the public *(continued)*

hearing. It may be necessary to request each participant limit any oral presentation to five minutes to provide all parties an opportunity to present.

Any individual with a disability may request an accommodation to participate in the public hearing and may request the proposed regulation and economic impact statement in an accessible format. Requests for accommodation to participate in the hearing should be made at least five working days in advance of the hearing by contacting Erik Wisner at 785-296-3411 or [erik.wisner@ks.gov](mailto:erik.wisner@ks.gov).

#### Article 501.—SOUTH CENTRAL GAMING ZONE

**111-501-6. Rules of the game.** (a) The cards shall be shuffled under the following circumstances:

(1) A new set of decks are put into play.

(2) When the cut card appears during the course of the play, in which case the shuffle will take place prior to the next round of play.

(3) Whenever the cards have been dropped or otherwise mishandled.

(4) Whenever instructed to do so by the table game supervisor or higher ranking casino official.

(5) At no time will the dealer shuffle at the request of a player unless authorized to do so by a table games supervisor or higher ranking casino official.

(b) The dealer is to maintain physical and visual contact with the deck at all times while the deck is out of the shoe; however, the cards shall be placed back in the dealer's shoe for commencement of play.

(c) A card shall be burned for the following reasons:

(1) After a shuffle of the cards.

(2) A card has been exposed or dealt by mistake unless the card was exposed or dealt by mistake to the player who acts immediately prior to the dealer.

(3) When a dealer is relieved, the new dealer shall burn a card.

(4) If there are players at the table, upon the arrival of new players, the dealer shall burn a card.

(d) All cards shall be dealt from a dealing shoe secured to and located on the extreme left-hand side of the table.

(e) All players' cards should be delivered face up, starting on the dealer's left and continuing clockwise around the table.

(f) After each player has received one card, the dealer shall take one card face down. A second card should be dealt to each player face up and the dealer's final card will be dealt face up. The card should be placed underneath the first card which is now turned face up and should cover the hole card in such a way that no part of that card is visible.

(g) A player may elect to double down with any initial two cards, and bet up to the amount of his original bet on

the condition that only one additional card shall be dealt to the player.

(h) The additional chips for the double-down bet should be placed next to the original wager before the double down card is dealt.

(i) The double down card will be exposed and placed across the two cards involved, in such a manner as to keep the number exposed on the player's second card.

(j) When paying double down bets, the bet is not combined into one stack and the stack is not sized into the other stack. The dealer is not permitted to move the player's bet with chips in the dealer's hand.

(k) Whenever the initial two cards to a player are of the same face value, the player may elect to split the cards into two separate hands, provided that the player makes a bet equal to the original bet. The following rules apply to splitting cards:

(1) After splitting, the first hand will receive a card. This hand will be completed by either hitting again or staying before the next hand is dealt to.

(2) The second hand will receive a card. This hand will be completed by either hitting again or staying before moving on to the next hand.

(3) A player may split up to three times excluding aces which may only be split once. When aces are split, the player will only receive one card per ace.

(l) The dealer will ask if any player wishes to place an insurance bet when the dealer's card dealt face up is an ace.

(m) Insurance is a separate bet. The player is betting that the dealer has blackjack. If the dealer does not have blackjack, then the player loses the player's insurance bet.

(n) The player can take insurance for any amount up to one-half of the original bet.

(o) The insurance bet shall be placed on the insurance line on the table layout.

(p) The dealer will then verbally close the time for accepting insurance bets.

(q) If the dealer's hand is a blackjack and the player has taken insurance, the dealer will take the losing bet and pay off the winning insurance bet with it in an amount not to exceed the player's original bet. Insurance will be paid at a rate of 2 to 1.

(r) If the player's hand is a blackjack and the dealer's card dealt face up is an ace, the player can announce even money and be paid the amount of the player's bet.

(s) Players may insure a toke bet and the bet is handled by the same procedure as any other insurance bet.

(t) A player may place more than one-half of their original bet on the insurance line but only one-half of their original bet is in action. Any overage will be returned to the player after it is determined that the dealer does or does not have blackjack.

(u) All blackjacks will be paid at odds of 3 to 2. The dealer shall pay the player having a blackjack during the normal course of the dealer's take and pay procedures. If the dealer and a player have blackjack, the player's bet will be a tie.

(v) If the dealer looks at the dealer's hole card and fails to recognize the fact the dealer has a blackjack, the dealer's hand will be played as a total of 21 only, and not as

(continued)

a blackjack. A player that doubles down or splits will receive back any additional wagers made after their initial wager.

(w) Any player's hand that exceeds a total of 21 has broke or busted and their hand loses.

(x) If the dealer has a card dealt face up with the value of ten, the dealer will use the peeking device built into the gaming table to check to see if the dealer has a blackjack.

(y) If the dealer has a blackjack all losing bets will be collected and all blackjacks will tie.

(z) If the dealer does not have blackjack the hand will continue as normal.

(aa) A card found turned upwards in the shoe shall not be used in that game and shall be placed in the discard rack.

(bb) A card drawn in error without its face being exposed shall be used as though it were the next card from the shoe.

(cc) After the initial two cards have been dealt to each player and a card is drawn in error and exposed to the players, such card shall be burned or placed in the discard rack and will not be offered to any player or to the dealer unless the card was exposed or dealt by mistake to the player who acts immediately prior to the dealer unless the card was exposed or dealt by mistake to the player who acts immediately prior to the dealer. In that case, if the card is needed by the dealer to complete the dealer's hand, then the card shall be retained by the dealer. If the card is not needed by the dealer to complete the dealer's hand, then the card shall be burned. In that case if the card is needed by the dealer to complete the dealer's hand, then the card shall be retained by the dealer. If the card is not needed by the dealer to complete the dealer's hand, then the card shall be burned.

(dd) If the dealer has a point total of a hard seventeen or more and accidentally draws a card for the dealer, such card shall be burned.

(ee) If the dealer misses dealing his first or second card to the dealer, the dealer shall continue dealing the first two cards to each player, and then deal the appropriate number of cards to the dealer.

(ff) If there are insufficient cards remaining to complete a round of play, all of the cards in the discard rack shall be shuffled and cut, the first card shall be drawn face down and burned, and the dealer shall complete the round of play.

(gg) If no cards or only one card is dealt to a player's hand, the hand is dead and the player shall be included in the next deal.

(hh) If any card is dealt and an error occurs, at no time will any card be backed up as a result of the error.

(ii) If a dispute occurs because of a mistake during a hand, the table games supervisor or higher ranking casino official shall be authorized to declare that all or part of the hand is void and can return any disputed money.

(jj) If offered at the blackjack table, a player making a blackjack wager may also make an optional three card poker wager or TriLux wager in the area on the table designated for that optional wager so long as the wager is made prior to the first card of the hand being removed from the shoe.

(kk) If a player makes an optional three card poker wager or TriLux wager, the player may also make a three card poker wager or TriLux wager as a tip for the dealer so long as the tip wager is made prior to the first card of the hand being removed from the shoe.

(ll) Resolution of all optional three card poker wagers or TriLux wager shall be made after all players and the dealer have received their second card and before the blackjack game continues.

(mm) An optional three card poker wager or TriLux wager will win if the dealer's card dealt face up and the player's two cards combined equal one of the following three card poker hands:

(1) A "flush," which means three cards of the same suit (hearts, spades, diamonds or clubs);

(2) A "straight," which means three cards of consecutive rank, with the ranking of cards from lowest to highest being 2, 3, 4, 5, 6, 7, 8, 9, 10, jack, queen, king, and ace, except that an ace can also be used with a 2 and 3 to make a straight;

(3) A "three of a kind," which means three cards of the same rank; and,

(4) A "straight flush," which means a "straight" as defined hereinabove, when all three cards are in the same suit.

(nn) An optional three card poker wager or TriLux wager will lose if the dealer's card dealt face up and the player's two cards combined do not equal one of the three card poker hands listed in subsection "mm," above.

(oo) All winning three card poker wagers or TriLux wagers shall be paid at the rate of nine to one.

(pp) All three card poker wagers or TriLux wagers shall be taken or paid from the dealer's right to left before the blackjack portion of the game continues.

(qq) If offered at the blackjack table, a player making a blackjack wager may also make an optional king's bounty deluxe side wager in the area on the table designated for that optional wager so long as the wager is made prior to the first card of the round being removed from the shoe.

(rr) An additional king's bounty deluxe wager may be made by the player prior to the first card on the round being removed from the shoe in an area designated for the king's bounty deluxe wager as a tip for the dealer.

(ss) To begin each round, a player must make his or her blackjack wager and any optional wagers the player chooses to make, including the king's bounty deluxe wager.

(tt) The dealer then follows normal procedures for dealing the game of blackjack.

(uu) All king's bounty deluxe wagers shall be settled as follows:

(1) The king's bounty deluxe wagers will be settled immediately after all players and the dealer receive their first two cards, except that if a player has two kings of spades and the dealer has a potential blackjack, the dealer will settle that king's bounty deluxe wager at the end of the round of play;

(2) If the dealer has a potential blackjack, the dealer will then check the dealer's hole card;

(3) If the dealer has a blackjack, the player will not have the option of adding to their blackjack wager; and,

(4) If the dealer does not have a blackjack, players will have the options as described in subsections (ww) and (xx) herein.

(vv) A king's bounty deluxe wager will win and be paid at the following odds if the player's first two cards are as follows:

(1) Two kings of spades and the dealer has a blackjack pays 1,000 to 1;

(2) Two kings of spades and the dealer does not have a blackjack pays 75 to 1;

(3) Two kings of the same suit, other than spades, pays 25 to 1;

(4) Two 10's, two jacks or two queens of the same suit pays 10 to 1;

(5) Suited 20, two cards of the same suit whose sum equals 20, pays 6 to 1;

(6) Two king's not of the same suit pays 4 to 1; and,

(7) Unsuited 20 which consists of two cards not of the same suit whose sum equals 20, pays 2 to 1.

(ww) Players who win a king's bounty deluxe wager, other than players that have two kings of spades when the dealer has a blackjack shall then have the option to either collect that wager and winnings or place any amount up to the entire king's bounty deluxe wager and winnings on the player's original blackjack wager, but the cumulative total of the amount so added plus the original blackjack wager may not exceed the table limits.

(xx) Players who win a king's bounty deluxe wager and apply all or part of the winnings to their original blackjack wager will have this cumulative amount considered to be their blackjack wager. If the player eventually splits pairs, the player must match the entire wager. If the player doubles down, the player may wager any amount up to a maximum of the player's original wager.

(yy) If offered at the blackjack table, a player making a blackjack wager may also make an optional royal match deluxe wager in the area on the table designated for the optional wager so long as the wager is made prior to the first card of the hand being removed from the shoe.

(zz) If a player makes an optional royal match deluxe wager, the player may also make a royal match deluxe wager as a tip for the dealer so long as the tip wager is made prior to the first card of the hand being removed from the shoe.

(aaa) Resolution of all optional royal match deluxe wagers shall be made after all players and the dealer have received their second card and before the blackjack game continues.

(bbb) A royal match deluxe wager will win if both of the player's two cards are in the same suit. A royal match deluxe wager will lose if both of the player's two cards are not in the same suit.

(ccc) Winning royal match deluxe wagers shall be paid at odds of two to one, unless the two cards are a king and queen of the same suit, in which case the player's wager shall be paid at odds of 15 to one.

(ddd) The dealer will then check the dealer's hole card. If the dealer's hand constitutes a blackjack, the dealer must pay the player his or her wager and winnings on the royal match deluxe wager.

(eee) If the dealer's hand does not constitute a black-

jack, a player winning a royal match deluxe wager shall have the following options:

(1) The player may collect the player's royal match deluxe wager and winnings; or,

(2) The player may place any or all of the player's royal match deluxe wager and winnings on their blackjack wager, except that the total amount of the blackjack wager may not exceed the maximum blackjack wager allowed for that hand of blackjack. If any portion of the royal match deluxe wager and winnings is not added to the player's blackjack wager, that portion shall be paid to the player. A player may add to the player's blackjack wager as set forth herein even if the player's hand constitutes a blackjack.

(fff) If a player adds any or all of the player's royal match deluxe wager and winnings to the blackjack wager, the amount added plus the original blackjack wager will then become the player's blackjack wager for that hand. If during that hand of blackjack the player splits pairs, the player must match that entire wager. If during that hand of blackjack the player doubles down, the player must place an additional wager in any amount that does not exceed the amount of the player's original wager.

(ggg) Only the dealer shall touch the gaming chips in order to add all or any portion of a winning royal match deluxe wager to a player's blackjack wager, per the instructions of that player. (C) An original wager will win if the total point value of the player's cards exceeds the total point value of the dealer's cards without exceeding a total point value of 21. In the event the player's first two cards have a total point value of 21, the player will have a blackjack.

(B) An additional insurance wager may be made as a tip for the dealer.

(C) An insurance wager will win at the rate of 2 to 1 if the dealer has a blackjack.

(D) An insurance wager will lose if the dealer does not have a blackjack.

(3) Double down wager:

(A) An additional wager may be made by the player up to the amount of the player's original wager on the condition only one additional card will be dealt to the player. This wager can be made on any hand consisting of two cards including after splitting, except that the wager may not be made after splitting aces.

(B) An additional double down wager may be made as a tip for the dealer only if the player has made an original wager for the dealer.

(C) A double down wager will win if the total point value of the player's cards exceeds the total point value of the dealer's cards without exceeding a total point value of 21.

(D) A double down wager will lose if the total point value of the player's cards exceeds 21 or is less than the total point value of the dealer's cards.

**111-501-127. Game operations.** (a) The game of Top 3 or TriLux Super 3 is played with six or more decks of cards. The following procedures for shuffling cards shall be implemented:

(1) The cards will be shuffled at various times including, but not limited to, the following circumstances:

(A) New decks are put into play.

(B) A shuffle will be performed after the completion of the hand in which the cut card appeared.

(C) The decks have been dropped or otherwise mis-handled.

(D) When instructed to do so by a table games supervisor or higher ranking casino official.

(2) The cards may be shuffled manually.

(3) Alternatively, a shuffling machine may be used to shuffle the cards.

(b) The following procedures for card cutting shall be implemented:

(1) Upon completion of the shuffle, the dealer will offer the decks to a player to cut. In the event players at the table fail or refuse to perform the cut, the dealer or table games supervisor will cut the cards.

(2) The cut will be performed by inserting the cut card a minimum of approximately one deck from either end of the stack.

(3) Once the deck has been cut, the dealer will insert the cut card approximately one and one-half decks from the back of the shoe unless otherwise instructed by the table games supervisor or pit manager.

(c) The following procedures for dealing and taking cards shall be implemented:

(1) All original wagers must be in place before the first card is dealt from the shoe.

(2) Cards are distributed to the players, one at a time, from left to right. The dealer distributes one card to himself face up before continuing. The dealer deals a second card to each player, one at a time, from left to right and deals a second card to himself face down directly under the up card.

(3) The winning three-card bets or TriLux bets will be paid and losing three-card bets or TriLux bets will be collected prior to the continuation of the game.

(4) The winning Top 3 bets or TriLux Super 3 bets will be paid and losing Top 3 bets or TriLux Super 3 bets will be collected prior to the continuation of the game.

(5) The winning insurance bets will be paid and losing insurance bets will be collected prior to the continuation of the game.

(6) Beginning with the first player position to the left of the dealer, each player will indicate whether they wish to stand or hit. The player will indicate wanting a hit by making a clearly visible motion with his or her hand. Cards will continue being distributed to each player, one at a time, receiving an additional signal from the player after each card, until the player indicates his or her desire to stand or the player's hand exceeds a total of 21, whichever comes first. To indicate a player's wish to stand, a player should motion slightly with his or her hands, palm down, toward the dealer.

(continued)

(7) After all of the players have stood or broken, the hole card will be turned face up announcing the total point value of the two cards. If any player's hand is still in action, the dealer will hit if the dealer holds cards with a total point value of 16 or less or a soft 17. The dealer will stand on a hard 17 or higher total point value. A "soft 17" hand contains an ace that is being counted as 11 points. A "hard 17" hand does not contain an ace that is being counted as 11 points.

(8) Winning original blackjack wagers, double down wagers, and split wagers will then be paid and losing blackjack wagers, double down wagers, and split wagers will then be collected beginning on the right and working towards the left.

(9) If a player has a losing hand, the dealer will remove the player's chips and pick up the cards for placement into the discard rack.

(d) The following procedures for burning cards shall be implemented:

(1) Dealers will burn a card after completion of the shuffle; and,

(2) Dealers will burn a card upon entering a game. (Authorized by K.S.A. 74-8710 and 74-8748; implementing K.S.A. 74-8710; effective, T-111-3-31-16, Feb. 10, 2016; amended, T-111-6-1-22, May 11, 2022.)
