**7-43-18. Standards for identity verification of a re-  
motely located individual.** (a) If a notary public does not  
have personal knowledge of a remotely located individual  
pursuant to K.S.A. 2021 Supp. 53-5a07(a) or satisfactory  
evidence of the identity of a remotely located individual  
pursuant to K.S.A. 2021 Supp. 53-5a07(b)(2) and amend-  
ments thereto, the notary public shall obtain satisfactory  
evidence of the identity of the remotely located individual  
through a multifactor authentication procedure as follows:

(1) Analyze the identification credential present-  
ed by the remotely located individual against trusted  
third-person data sources using a process that shall, at a  
minimum, meet the following requirements:

(A) Use public or private data sources to confirm the  
validity of the identification credential;

(B) use automated software processes to aid the notary  
public in verifying the identity of each remotely located  
individual;

(C) require that the identification credential pass an au-  
thenticity test, consistent with sound commercial prac-  
tices that use appropriate technologies to confirm the  
integrity of visual, physical, or cryptographic security  
features; confirm that the identification credential is not  
fraudulent or inappropriately modified; and provide the  
results of the authenticity test to the notary public; and

(D) use information held or published by the issuing  
source or an authoritative source, as available and con-  
sistent with sound commercial practices, to confirm the  
validity of personal details and identification credential  
details; and

(2) verify the remotely located individual's identity by  
requiring the individual to answer a quiz consisting of at  
least five questions related to the individual's personal  
history or identity and formulated from public or private  
data sources, as follows:

(A) The quiz shall meet the following requirements:

(i) Each question shall have at least five possible an-  
swer choices;

(ii) at least 80 percent of the questions shall be an-  
swered correctly; and

(iii) all questions shall be answered within two minutes;

(B) if the remotely located individual fails to answer  
at least 80 percent of the questions correctly on the first  
attempt, the individual may retake the quiz one time

(continued)

within 24 hours. During a retake of the quiz, at least 40 percent of the prior questions shall be replaced;

(C) if the remotely located individual fails the second attempt, the individual shall not be allowed to retake the quiz with the same notary public within 24 hours of the second failed attempt; and

(D) the notary public shall not be able to see or record the questions or answers. However, the results indicating passage or failure of the quiz shall be provided to the notary public.

(b) After obtaining satisfactory evidence of the identity of the remotely located individual as described by this regulation, the remotely located individual shall visually compare for consistency the information and photo presented on the identification credential itself and the individual as viewed by the notary public in real time through communication technology. The image resolution of the communication technology being used shall be sufficient to enable visual inspection by the notary public, including legible text and the clarity of identification credential features.

(c) Any notary public may obtain satisfactory evidence of the identity of a remotely located individual by oath or affirmation of a credible witness by means of one of the following:

(1) Having personal knowledge of the identity of the credible witness by the notary public;

(2) presenting an identification credential to the notary public, as required by K.S.A. 2021 Supp. 53-5a07(b)(2) and amendments thereto, if the credible witness is in the same location as the notary public; or

(3) utilizing the multifactor authentication procedure required by this regulation for verifying the identity of a remotely located individual and visually inspecting the identification credential presented by the credible witness if the witness is not in the same location as the notary public.

(d) If a remotely located individual must exit the notarization session at any point, the notary public shall reverify the identity of the remotely located individual as required by this regulation. (Authorized by K.S.A. 2021 Supp. 53-5a27; implementing K.S.A. 2021 Supp. 53-5a15; effective, T-7-6-30-22, June 30, 2022.)

**7-43-19. Security of records bearing a notarial certificate.** (a) For each tangible record, the notary public shall affix the notarial certificate directly on the record to be notarized, except as provided in this subsection. If a notarial certificate cannot be affixed to a record to be notarized because the record lacks adequate space for a notarial certificate, the notary public shall affix a notarial certificate to a separate page and attach the record to the notarial certificate by staple or other secure method so that the removal of the record or the addition of a record is discernible. Each attachment shall include a description of the document to which it is attached.

(b)(1) For each electronic record, the notary public shall attach or logically associate the notary public's electronic signature by use of a digital certificate to a notarial certificate that is affixed to or logically associated with the electronic record that is the subject of a notarial act. The digital certificate shall have tamper-evident technology meeting the following requirements:

(A) The name on the electronic official stamp shall match the name, as stated on the application, under which the notary public is commissioned and performs all remote notarial acts.

(B) The technology used to attach an electronic signature to a document shall allow the notary public's electronic signature to meet the following requirements:

(i) Be attributed or uniquely linked to the notary public;

(ii) be capable of independent verification;

(iii) be retained under the notary public's exclusive control by use of passphrase protection; and

(iv) be attached to or logically associated with the electronic document to which it relates in such a manner that any subsequent change of the electronic document is detectable.

(2) A notary public shall not perform a notarial act with respect to an electronic record if the digital certificate meets any of the following conditions:

(A) Has expired;

(B) has been revoked or terminated by the issuing or registering authority;

(C) is invalid; or

(D) is incapable of authentication.

(3) Any notary public may attach an official stamp to a notarial certificate that is affixed to or logically associated with the electronic record. (Authorized by K.S.A. 2021 Supp. 53-5a27; implementing K.S.A. 2021 Supp. 53-5a16, 53-5a18, and 53-5a27; effective, T-7-6-30-22, June 30, 2022.)

**7-43-20. Notarial acts for remotely located individuals.** (a) Any notary public may perform notarial acts for remotely located individuals only after being commissioned as a notary public and notifying the secretary that the notary public will be performing notarial acts for remotely located individuals.

(b) A notary public shall not perform a notarial act for a remotely located individual if the notary public is not physically located in Kansas at the time of the notarization.

(c) Upon performing a notarial act for a remotely located individual, the notary public shall electronically attach a notarial certificate to the document being notarized. Each notarial certificate for a notarial act for a remotely located individual shall meet the following requirements:

(1) State the name of the remotely located individual;

(2) provide the date the notarial act occurred;

(3) identify the state and county in which the notarial act was performed;

(4) include a description of the type of notarial act performed, which shall be sufficient if the description is substantially similar to a short form specified in K.A.R. 7-43-17;

(5) include a statement regarding the use of communication technology as specified in K.A.R. 7-43-17; and

(6) contain the notary public's official stamp that is attached to the record and signed by the notary public with the notary public's digital certificate.

(d) Each notary public who performs a notarial act for a remotely located individual shall maintain an audiovisual recording of all notarial acts in addition to a journal of notarial acts that contains the entries required under

K.S.A. 2021 Supp. 53-5a20(c), and amendments thereto. The audiovisual recording shall include the following, at a minimum:

(1) Confirmation by the notary public that the individual has successfully completed identity proofing and credential analysis;

(2) visual confirmation of the identity of the individual through visual inspection of the credential used during credential analysis; and

(3) the actual notarial act performed.

(e) Each notary public shall attach that individual's electronic signature to the notarial certificate on an electronic record in a manner that is capable of independent verification and renders any subsequent change or modification to the electronic record tamper-evident. (Authorized by K.S.A. 2021 Supp. 53-5a27; implementing K.S.A. 2021 Supp. 53-5a15, 53-5a16, and 53-5a21; effective, T-7-6-30-22, June 30, 2022.)

(2) provide a means for the notary public reasonably to confirm that the electronic record before the notary public is the same record in which the remotely located individual made a statement or on which the remotely located individual executed a signature;

(3) utilize a means of authentication that reasonably ensures that only the proper parties have access to the audiovisual recording;

(4) be capable of securely creating and storing or transmitting securely to be stored the recording of the audiovisual communication;

(5) keep confidential the questions asked as part of any identity proofing quiz and the means and methods used to generate the results of the credential analysis; and

(6) provide reasonable security measures to prevent unauthorized access to the following:

(A) The live transmission of the audiovisual communication;

(C) the electronic records presented for electronic notarization.

(b) A notary public shall not be prohibited from receiving, installing, or using a hardware or software update to the technologies that the notary public identified in a notification form to perform notarial acts for remotely located individuals if the hardware or software update is not materially different from the technologies that the notary public identified on the notification form to perform notarial acts for remotely located individuals. If the provider of the technology notifies the notary public that the hardware or software update is materially different, the notary public shall notify the secretary of the updated technology.

(c) All communication technology that is verified by the provider of the communication technology under penalty of perjury as meeting the requirements in this regulation shall be approved by the secretary. (Authorized by K.S.A. 2021 Supp. 53-5a27; implementing K.S.A. 2021 Supp. 53-5a15; effective, T-7-6-30-22, June 30, 2022.)

**7-43-22. Notarial acts for remotely located individuals; providers of communication technology.** (a)(1) Any notary public authorized to perform notarial acts for remotely located individuals may use a provider of communication technology and identity proofing if the provider has submitted evidence under penalty of perjury to the secretary and to the notary public that the provider meets the requirements in K.A.R. 7-43-18 and 7-43-19(b), in addition to the following:

(B) providing the notary public with access to the recording of the notarial act using audiovisual communication technology.

(2) The provider shall make and retain a secure backup of any record that is related to a notarial act for a remotely located individual.

(A) If the provider of communication technology and the provider of the backup are the same entity and the provider ceases business operations, the provider shall notify the notary public in advance of the cessation of business operations and, at the notary public's request, shall release any record related to a notarial act performed for a remotely located individual by the notary public.

(B) If the provider of communication technology and the provider of the backup are separate entities, the provider of communication technology shall sign an agreement with the provider of the backup that includes both of the following requirements:

(i) If the provider of communication technology or the provider of the backup ceases business operations, the entity ceasing business operations shall notify the other entity and the notary public in advance of the cessation of business operations.

(ii) At the notary public's request, the provider of the backup shall release to the notary public any record related to a notarial act for a remotely located individual performed by the notary public.

(b) Each provider of communication technology shall protect from unauthorized access the audiovisual recording of each notarial act and any "personal information," as defined in K.S.A. 50-7a01 and amendments thereto, disclosed during the performance of a notarial act using communication technology. The audiovisual recording shall be created in an industry-standard file format and shall not include images of any electronic record on which the remotely located individual made a statement or on which the remotely located individual executed a signature.

(c) Each notary public shall take reasonable steps to ensure that the communication technology used to perform a notarial act for a remotely located individual is secure from unauthorized interception.

*(continued)*

(d) Any provider of communication technology may provide a hardware or software update to the technologies that the notary public identified in the notification form to perform notarial acts for remotely located individuals if the hardware or software update is not materially different from the technologies that the notary public identified on the notification form to perform notarial acts for remotely located individuals. The provider of communication technology shall offer an assurance to the notary public that the update does not represent a material difference from the technology that the notary public identified on the notification form provided to the secretary. If the provider of the technology notifies the notary public that the hardware or software update is materially different from the hardware or software identified on the notification form to perform notarial acts for remotely located individuals provided to the secretary, the notary public shall update the technology information with the secretary. (b) Each notary public who maintains a notary public journal in an electronic format shall meet the following requirements:

(1) Retain the journal and any audiovisual recordings in a way that protects the journal and recordings against unauthorized access by means of a password or other secure means; and

(2) take reasonable steps to ensure that a backup of the journal and audiovisual recordings exists and is secure from unauthorized use.

(c) On the death or adjudication of incompetency of a current or former notary public, the notary public's personal representative or guardian or any other person knowingly in possession of a journal or an audiovisual recording shall perform one of the following:

(1) Comply with the retention requirements of this regulation;

(2) transmit each journal and audiovisual recording to one or more repositories under subsection (d); or

(3) transmit each journal and audiovisual recording in an industry-standard readable data storage device to the secretary.

(d) A notary public, a guardian, conservator, or agent of a notary public, or a personal representative of a deceased notary public may, by written contract, engage a third party to act as a repository to provide the storage required by this regulation if a third party has verified to the secretary under penalty of perjury that the party meets the requirements specified in this regulation. The contract shall meet either of the following requirements:

(1) Enable the notary public, the guardian, conservator, or agent of the notary public, or the personal representative of the deceased notary public to comply with the retention requirements of this regulation even if the contract is terminated; or

(d) When used in this regulation, terms shall be construed to have the meanings specified in K.S.A. 65-1626, and amendments thereto.

This regulation shall become effective on July 1, 2022. (Authorized by and implementing K.S.A. 65-1130, as amended by 2022 S Sub for HB 2279, sec. 1; effective, T-60-9-12-88, Sept. 12, 1988; effective Feb. 13, 1989; amended May 7, 1990; amended Jan. 3, 1995; amended March 31, 2000; amended May 18, 2012; amended, T-60-6-30-22, July 1, 2022.)

**60-11-113. License renewal.** (a) Advanced practice registered nurse licenses shall be renewed on the same biennial cycle as the cycle for the registered professional nurse licensure renewal, as specified in K.A.R. 60-3-108.

(b) On and after January 1, 2013, each individual renewing a license shall have completed the required 30 contact hours of approved continuing nursing education (CNE) related to the advanced practice registered nurse role during the most recent prior license period. Proof of completion of 30 contact hours of approved CNE in the advanced practice nurse role may be requested by the board. Contact hours accumulated in excess of the 30-hour requirement shall not be carried over to the next renewal period.

(c) The number of contact hours assigned to any offering that includes a recognized standard curriculum shall be determined by the board.

(d) Any individual attending any offering not previously approved by the board may submit an application for an individual offering approval (IOA). Credit may be given for offerings that the licensee demonstrates as having a relationship to the practice of the advanced practice registered nursing role. Each separate offering shall be approved before the individual submits the license renewal application.

(e) Approval shall not be granted for identical offerings completed within the same license renewal period.

(f) Any individual renewing a license may accumulate 15 contact hours of the required CNE from instructor credit. Each presenter shall receive instructor credit only

once for the preparation and presentation of each course. The provider shall issue a certificate listing the number of contact hours earned and clearly identifying the hours as instructor credit.

(g) Fractions of contact hours may be accepted for offerings over 30 minutes.

(h) All CNE accumulated for APRN license renewal shall also be applicable to the renewal of the registered professional nurse license.

(i) Any APRN whose initial licensure is before July 1, 2023 may submit evidence of APRN certification to the board upon license renewal.

(j) An APRN shall provide proof of malpractice insurance coverage when renewing the license if the APRN renders professional clinical services, unless the ad-

vanced practice registered nurse meets one of the exceptions listed in K.S.A. 65-1130 as amended by 2022 S Sub for HB 2279, sec. 1, and amendments thereto.

This regulation shall become effective on July 1, 2022. (Authorized by K.S.A. 2021 Supp. 65-1117, K.S.A. 65-1129, and K.S.A. 65-1130, as amended by 2022 S Sub for HB 2279, sec. 1; implementing K.S.A. 2021 Supp. 65-1117, K.S.A. 65-1130, as amended by 2022 S Sub for HB 2279, sec. 1, and K.S.A. 65-1132; effective Sept. 2, 1991; amended May 9, 1994; amended July 29, 2005; amended May 18, 2012; amended, T-60-6-30-22, July 1, 2022.)
