The purpose of a Class I permit is to identify the sources and types of regulated air pollutants emitted from the facility; the emission limitations, standards and requirements applicable to each source; and the monitoring, record keeping and reporting requirements applicable to each source as of the effective date of permit issuance.

Regency Gas Services, 401 Edwards St., Suite 1320, Shreveport, Louisiana, owns and operates Hugoton #3 compressor station located at Section 23, T25S, R36W, Kearny County, Kansas.

A copy of the proposed permit, permit application, all supporting documentation and all information relied upon during the permit application review process is available for a 30-day public review during normal business hours at the KDHE, Bureau of Air, 1000 S.W. Jackson, Suite 310, Topeka; and a copy of the proposed permit can be reviewed at the KDHE Southwest District Office, 302 W. McArtor Road, Dodge City. To obtain or review the proposed permit and supporting documentation, contact Michael J. Parhomek, (785) 296-1580, at the KDHE central office; and to review the proposed permit only, contact Ethyl Evans, (620) 225-0596, at the KDHE Southwest District Office. The standard departmental cost will be assessed for any copies requested.

Direct written comments or questions regarding the proposed permit to Michael J. Parhomek, KDHE, Bureau of Air, 1000 S.W. Jackson, Suite 310, Topeka, 66612-1366. In order to be considered in formulating a final permit decision written comments must be received before the close of business March 11.

A person may request a public hearing be held on the proposed permit. The request for a public hearing shall be in writing and set forth the basis for the request. The written request must be submitted to Sharon Burrell, Bureau of Air, not later than the close of business March 11 in order for the Secretary of Health and Environment to consider the request.

The U.S. Environmental Protection Agency has a 45-day review period, which will start concurrently with the 30-day public comment period, within which to object to the proposed permit. If the EPA has not objected in writing to the issuance of the permit within the 45-day review period, any person may petition the administrator of the EPA to review the permit. The 60-day public petition period will directly follow the EPA's 45-day review period. Interested parties may contact KDHE to determine if the EPA's 45-day review period has been waived.

Any such petition shall be based only on objections to the permit that were raised with reasonable specificity during the public comment period provided for in this notice, unless the petitioner demonstrates that it was impracticable to raise such objections within such period, or unless the grounds for such objection arose after such period. Contact Patricia Scott, U.S. EPA, Region VII, Air Permitting and Compliance Branch, 901 N. 5th St., Kansas City, KS 66101, (913) 551-7312, to determine when the 45-day EPA review period ends and the 60-day petition period commences.

#### Executive Order 09-08

WHEREAS, like the rest of the world, the State of Kansas is making preparations to deal with issues stemming from an outbreak of the H1N1 flu virus and one of the biggest concerns is preventing the spread of the virus; and

WHEREAS, as an employer, the State of Kansas is instructing employees with flu-like symptoms to stay away from the workplace until they are fever free for a period of 24 hours without the use of fever-reducing medications, and

WHEREAS, some employees may feel compelled to come to work in spite of being ill, possibly spreading the virus to co-workers, due to the fact that the employee does not have sufficient accrued leave to remain away from the workplace without using leave without pay.

NOW, THEREFORE, pursuant to the authority vested in me as Governor of the State of Kansas, I hereby adopt a Leave Advancement policy whereby agency appointing authorities may provide paid leave to employees who have exhausted their own accrued leave not to exceed the amount of hours the employee is regularly scheduled to work in a bi-weekly pay period in order to remain in pay status while staying away from the workplace due to possible infection with the H1N1 flu virus, or for other circumstances where the appointing authority believes the granting of such leave would be in the best interests of the State of Kansas. Any leave provided in accordance with this policy will be deducted from the recipient's future accrued leave as it is earned and if an employee separates from State service prior to "repaying" any amount of leave received under this policy, the dollar amount of that leave shall be deducted from the employee's final paycheck.

Furthermore, leave provided to an employee pursuant to this policy must be requested and approved in accordance with appropriate agency policies and procedures and agency appointing authorities may choose not to provide this leave to an employee who the appointing authority believes has abused their leave privileges. The Secretary of Administration shall implement guidelines regarding the specific policies and procedures of the Leave Advancement policy authorized by this Executive Order.

This authority applies to all classified, benefits eligible positions in the Executive Branch as well as all unclassified, benefits eligible positions in the Executive Branch whose salaries are approved by the Governor.

WHEREAS, the 2-1-1 number is an easy-to-remember telephone number that facilitates critical connections between individuals and families seeking services, volunteer opportunities, or both and the appropriate human services agencies, including community-based and faith-based organizations and government agencies; and

WHEREAS, with approximately 1,500,000 nonprofit organizations in the United States, including 18,540 in Kansas, individuals and families often find it difficult to navigate through a complex and ever-growing maze of human service agencies and programs, spending inordinate amounts of time trying to identify an agency or program that provides a service that may be immediately or urgently required and often abandoning the search from frustration or lack of quality information; and

WHEREAS, at the Federal, State and local levels, government funding supports well-intentioned systems that are not fully utilized because of lack of access to and information on such programs by the public; and

WHEREAS, program administrators have indicated that there is a need for a simple way to connect those eligible for programs with available program resources; and

WHEREAS, 2-1-1 telephone service can reduce the number of inappropriate calls to government offices by directing consumers to the appropriate human services agent, resulting in a more effective use of government services; and

WHEREAS, Americans desire to volunteer and become involved in their communities and a simple call to 2-1-1

(continued)

will help Kansans find the volunteer opportunity they seek; and

WHEREAS, 2-1-1 telephone service has been recognized by the 107th Congress for the important role 2-1-1 plays in disaster prevention, community preparedness and response information, and public and community health information, thus making our State's communities safer, stronger and better prepared to respond to threats of domestic and international terrorism and domestic emergency situations of all natures; and

WHEREAS, 2-1-1 telephone service facilitates the availability of a single repository where comprehensive data on all community services is collected, maintained and updated regularly, reducing costs and duplication of efforts; and

WHEREAS, 2-1-1's reliable data allows for better assessment of the needs of our communities and immediate mobilization of resources toward those needs; and

WHEREAS, United Way of the Plains has established a statewide 2-1-1 call center that ensures prompt and efficient dissemination of information by highly trained call center representatives and has established standards for its call center operations; and

WHEREAS, a single information network has been created by United Way of the Plains through leveraged resources so that every resident of the State with phone service can dial the 2-1-1 telephone at no charge to the caller; and

WHEREAS, the 2-1-1 statewide database is available to all residents of the State as well as all human services programs, through the Internet, allowing for individuals to search for programs or services available according to the data gathered from human services programs in the State.

NOW, THEREFORE, pursuant to the authority vested in me as Governor of the State of Kansas, I hereby designate United Way of the Plains as the lead entity for 2-1-1 Kansas as identified in the Calling for 2-1-1 Act of 2009.

**82-3-1112. Mechanical integrity testing.** (a) Each CO<sub>2</sub> storage well shall be completed, equipped, operated, and maintained in a manner that prevents pollution of usable water and confines the CO<sub>2</sub> in the tubing or casing and in the formations approved for storage.

(b) A CO<sub>2</sub> storage well shall be considered to have mechanical integrity if the well demonstrates both internal and external integrity.

(c) Internal integrity shall be demonstrated by a successful pressure test. The operator shall perform a successful pressure test on each CO<sub>2</sub> storage well before placing the storage well in operation and at least once every two years thereafter.

(d) The pressure test shall be conducted under the supervision of an employee of the operator of the CO<sub>2</sub> storage facility. The date of the test shall be mutually agreed to by the CO<sub>2</sub> storage facility operator and the conservation division. The test shall be conducted as follows:

(1) A minimum fluid pressure of 300 psig shall be applied to the tubing casing annulus at the surface for a period of 30 minutes. Internal mechanical integrity shall be demonstrated if the applied pressure does not decrease by more than 10 percent.

(2) The test results shall be verified by the CO<sub>2</sub> storage facility's representative.

(e) External integrity shall be demonstrated by cased hole logs. A minimum of a gamma ray, neutron, and temperature logs shall be run from 50 feet above the point of injection continuously to the surface. The use of an alternative log may be approved by the director upon written request.

(f) Each CO<sub>2</sub> storage well shall demonstrate external integrity at least once every four years.

(g) If a CO<sub>2</sub> storage well fails to demonstrate mechanical integrity, the operator of the well shall, upon discovery, isolate each leak in a manner that contains CO<sub>2</sub> and associated fluids in the storage well or storage reservoir and demonstrates that the well does not pose a threat to public health and safety and usable water. The operator shall perform one of the following within 90 days:

(1) Repair and retest the storage well to demonstrate mechanical integrity; or

(2) plug the storage well according to K.A.R. 82-3-1118. (Authorized by and implementing K.S.A. 2007 Supp. 55-1637; effective Feb. 26, 2010.)

**82-3-1113. Report of leak, potential leak, or loss of containment.** (a) Each operator of a CO<sub>2</sub> storage facility shall report each leak, each potential leak, and any pressure changes or other monitoring data that indicate a loss of containment of injected CO<sub>2</sub> or associated fluids. The report shall be made orally to the appropriate conservation division district office and to the conservation division central office by the next business day following discovery. The oral report shall be confirmed in writing to the conservation division central office within three business days following the oral report.

(b) The operator shall submit a written summary of the cause or causes of each leak or loss of containment or the data indicating a potential leak or potential loss of containment to the conservation division central office within 10 days following the written report required in subsection (a). The summary shall also evaluate whether the situation poses a threat to public health and safety, usable water, or property.

(c) Within 30 days following the summary report required by subsection (b), the operator of the CO<sub>2</sub> storage facility shall submit an action plan to repair the leak or regain containment for the conservation division's review and approval. The action plan shall describe any corrective action, monitoring, or operational procedures that have been or will be taken.

(d) The installation of observation or monitoring wells may be required by the director to gain additional information about the leak or loss of containment.

(e) Additional reports may be required by the director until the leak or loss of containment is remediated. (Authorized by and implementing K.S.A. 2007 Supp. 55-1637; effective Feb. 26, 2010.)

**82-3-1114. Temporary abandonment of storage wells.** (a) Within 90 days after a CO<sub>2</sub> storage well ceases operation, the operator of that well shall perform one of the following:

(1) Plug the well in accordance with K.A.R. 82-3-1118; or

(2) file an application with the conservation division requesting temporary abandonment, on a form provided by the conservation division.

(b) One of the following actions shall be taken by the director:

(1) Approval of temporary abandonment of the storage well for one year; or

(2) denial of temporary abandonment if the storage well poses a threat to public health and safety or usable water.

(c) Applications for one-year extensions of temporary abandonment may be granted by the director for a maximum of 10 years. Each application for extension of temporary abandonment shall be filed before the expiration of the previous one-year temporary abandonment period.

(d) Before a temporary abandonment or any extension is granted, a demonstration of the well's internal mechanical integrity may be required by the director by means of a pressure test according to K.A.R. 82-3-1112(d)(1).

(e) If a temporary abandonment application or any extension application is denied and the storage well is not placed back in service, the storage well shall be deemed permanently abandoned and shall be plugged in accordance with K.A.R. 82-3-1118. (Authorized by and implementing K.S.A. 2007 Supp. 55-1637; effective Feb. 26, 2010.)

**82-3-1115. Temporary abandonment of a storage facility.** (a) Any operator of a CO<sub>2</sub> storage facility may temporarily abandon the storage facility upon submitting written notice to the conservation division. The notice shall be submitted to the conservation division at least 90 days before the temporary abandonment. The notice shall include the following:

(1) The date on which the storage facility is to be temporarily abandoned;

(2) the projected temporary abandonment period;

(3) the monitoring procedures to be utilized at the facility during the temporary abandonment period;

(4) the temporary abandonment applications for each CO<sub>2</sub> storage well filed according to K.A.R. 82-3-1114, except any CO<sub>2</sub> storage wells for which temporary abandonment has already been approved; and

(5) any other relevant information required by the conservation division.

(b) One of the following actions shall be taken by the director:

(1) Approval of temporary abandonment of the storage facility for one year; or

(2) denial of temporary abandonment if the storage facility poses a threat to public health and safety or usable water.

(c) Applications for one-year extensions of temporary abandonment may be granted by the director for a maximum of 10 years. Each application for extension of temporary abandonment shall be filed before the expiration of the previous one-year temporary abandonment period. (Authorized by and implementing K.S.A. 2007 Supp. 55-1637; effective Feb. 26, 2010.)

**82-3-1116. Application for decommissioning and abandonment of storage facility.** Any operator of a CO<sub>2</sub> storage facility may permanently decommission and abandon the storage facility upon application to, and approval from, the conservation division. The application shall be submitted at least 90 days before the beginning of decommissioning activities and shall contain a detailed decommissioning plan that includes the following:

(a) The anticipated date on which the storage facility will cease injection and withdrawal;

(continued)

(b) the anticipated storage reservoir pressure after injection and withdrawal cease;

(c) a schedule for abandoning the storage facility, including when and how all equipment and buildings will be abandoned and when the CO<sub>2</sub> storage wells will be plugged;

(d) the name and address of persons responsible for any equipment and buildings to be left in place;

(e) an updated closure plan as required by K.A.R. 82-3-1101;

(f) the method of monitoring to demonstrate the containment, pressure, and position of the CO<sub>2</sub> plume during the closure period; and

(g) any other relevant information that the director may require to ensure the protection of public health and safety and usable water, considering the unique conditions of the storage facility. (Authorized by and implementing K.S.A. 2007 Supp. 55-1637; effective Feb. 26, 2010.)

**82-3-1117. Postclosure determination.** (a) Each CO<sub>2</sub> storage facility operator seeking a postclosure determination shall submit an application to the conservation division.

(b) The CO<sub>2</sub> storage facility operator shall demonstrate that both of the following conditions are met before postclosure status may be granted:

(1) The CO<sub>2</sub> plume has stabilized, is contained within the storage reservoir, and is not a threat to public health and safety and usable water.

(2) The CO<sub>2</sub> storage reservoir pressure is stable.

(c) If the application is denied, the closure period activities shall continue as directed by the director.

(d) Upon written approval of postclosure status, the operator shall plug the remaining monitor wells in accordance with K.A.R. 82-3-1118. After the remaining monitor wells are plugged, the CO<sub>2</sub> storage facility permit shall be revoked. (Authorized by and implementing K.S.A. 2008 Supp. 55-1637; effective Feb. 26, 2010.)

**82-3-1118. Plugging methods and procedures, plugging report, and plugging fee for CO<sub>2</sub> storage wells.**

(a) Each CO<sub>2</sub> storage well shall be plugged in accordance with a plugging plan submitted by the operator and approved by the director. Before commencing any plugging operations, the operator shall perform the following:

(1) Provide a written plugging plan to the appropriate conservation division district office and the conservation division central office at least 30 days before the planned commencement of plugging operations;
