The written request must be submitted to Sharon Burrell, Bureau of Air, not later than the close of business August 23 in order for the Secretary of Health and Environment to consider the request.

The U.S. Environmental Protection Agency has a 45-day review period, which will start concurrently with the 30-day public comment period, within which to object to the issuance of the permit within the 45-day review period, any person may petition the administrator of the EPA to review the permit. The 60-day public petition period will directly follow the EPA's 45-day review period. Interested parties may contact KDHE to determine if the EPA's 45-day review period has been waived.

Any such petition shall be based only on objections to the permit that were raised with reasonable specificity during the public comment period provided for in this notice, unless the petitioner demonstrates that it was impracticable to raise such objections within such period, or unless the grounds for such objection arose after such period. Contact Patricia Scott, U.S. EPA, Region VII, Air Permitting and Compliance Branch, 901 N. 5th St., Kansas City, KS 66101, (913) 551-7312, to determine when the 45-day EPA review period ends and the 60-day petition period commences.

**82-17-2. Utility requirements pursuant to the act.**

(a) In addition to the requirements set forth in the act, any utility may install, at its expense, equipment to allow for load research metering for purposes of monitoring each net metered facility.

(b) Responsibilities for maintenance, repair, or replacement of meters, service lines, and other equipment provided by the utility shall be governed by the utility's current tariffs and terms of service on file with commission. This equipment shall be accessible at all times to utility personnel.

(c) Each utility's interconnection with a customer-generator's net metered facility shall be subject to the utility's current tariffs and terms of service on file with commission.

(d) Each utility shall enter into a written interconnection application or interconnection agreement with each customer-generator that is equivalent to sample forms available from the commission. Each agreement shall include the following information:

(1) Customer name, mailing address, service address, phone number, and emergency contact phone number;

(2) utility account number and number of meters associated with the account;

**82-17-3. Tariff requirements.** Each utility shall file a tariff with the commission setting forth the terms and conditions for net metering interconnection with a customer-generator. In addition to setting forth the terms and conditions required by the act, the tariff shall include the following information:

(a) Any specific criteria and guidelines for determining the appropriate size of generation to fit the expected load;

(b) a provision requiring the customer-generator to furnish, install, operate, and maintain in good repair without cost to the utility any relays, locks and seals, breakers, automatic synchronizers, disconnecting devices, and any other control and protective devices required by an applicable recognized industry standard that is clearly identified in the tariff or in a tariff that is already approved by the commission, or by any requirements adopted by federal, state or local governing authorities for the interconnection of net-metered facilities, for the parallel operation of the net metered facility with the utility's system;

(c) a provision requiring the customer-generator to supply, at no expense to the utility, a suitable location for the utility's equipment;

(d) a statement indicating whether or not the utility requires the customer-generator to install a utility-con-

trolled manual disconnect switch located on the line side of a meter that has the capability to be locked out by utility personnel to isolate the utility's facilities if an electrical outage in the utility's facilities occurs. If a manual switch is required, the utility shall give notice to the customer-generator, as soon as possible, when the switch is locked out or used by the utility. The disconnect switch may also serve as a means of isolation for the net metered facility during any customer-generator maintenance activities, routine outages, or emergencies;

(B) requiring more frequent monitoring or reporting by the permittee;

(C) changing an interim compliance date in a schedule of compliance, if the new date is not more than 120 days after the date specified in the existing permit and does not interfere with attainment of the final compliance date requirement;

(D) allowing for a change in ownership or operational control of a facility if the secretary determines that no other change in the permit is necessary, if a written agreement containing a specific date for transfer of permit responsibility, coverage, and liability between the current and new permittee has been submitted to the secretary;

(E) changing quantities or types of fluids injected that are within the capacity of the facility as permitted, if the change meets the following conditions:

(i) The change would not interfere with the operation of the facility;

(ii) the change would not interfere with the facility's ability to meet conditions described in the permit; and

(iii) the change would not change the facility's classification;

(F) changing construction requirements previously approved by the secretary; and

(k) Each permittee shall give oral notification to the department of a verified exceedence of the maximum permitted injection pressure within 24 hours of discovery of the exceedence and submit written notification within seven calendar days to the department.

(l) Each new well shall have a meter to measure injection or withdrawal volume. The permittee shall maintain records of these flow volumes at the facility and shall make the records available to the secretary upon request.

(m) Each permittee shall submit a ground subsidence monitoring plan to the secretary within two years after the effective date of these regulations. The following requirements shall apply:
