Appendix A

Uniform Standards of Professional Appraisal Practice (USPAP) Standard Rule 6-1

In developing a mass appraisal, an appraiser must:

(a) be aware of, understand, and correctly employ those generally accepted methods and techniques necessary to produce a credible mass appraisal;

Comment: Departure from this binding requirement is not permitted.

This rule recognizes the principal of change continues to affect the manner in which appraisers perform mass appraisals. To keep abreast of these changes and developments in the real estate field, the appraisal profession is constantly reviewing and revising appraisal methods and techniques and devising new methods and techniques to meet new circumstances. For this reason it is not sufficient for appraisers to simply maintain the skills and the knowledge they possess when they become appraisers. Mass appraisers must continuously improve their skills to remain proficient.

To meet the expectations and obligations of USPAP Standard Rule 6-1 the division of property valuation develops and requires technical training courses and workshops for county appraisers, county appraisal staff and private appraisal firms. This includes training on the Orion CAMA system and related software applications required to develop competent analyses, properly calibrate models, employ accepted mass appraisal techniques, complete appraisal maintenance tasks according to specifications and produce a credible mass appraisal. Successful completion of training requires full attendance and a passing grade of 70% or more on the final exam in tested courses and workshops.
