**Governor’s Grants Program**

**Notice of Available Grant Funding from the Federal Sexual Assault Services Grant Program**

Grant funds are available from the Federal Sexual Assault Services Grant Program (SASP) for calendar year 2018. The purpose of SASP is to provide intervention, advocacy, accompaniment (e.g., accompanying victims to court, medical facilities, police departments), support services, and related assistance for adult, youth, and child victims of sexual assault; family and household members of sexual assault victims; and those collaterally affected by the sexual assault victimization. This grant program recognizes the need to place increased focus on sexual assault in order to address the lack of available direct intervention and related assistance services and the unique aspects of sexual assault trauma. Women and men of all ages, as well as children, can be victims of sexual assault.

There is approximately \$362,800 available for grant awards. Available grant funds may be awarded to rape crisis centers and other nonprofit, nongovernmental organizations, or tribal programs for programs and activities that provide rape and sexual assault services for the defined grant project purposes. Priority will be given to applicants that are rape/sexual assault crisis centers providing direct intervention and related assistance to victims/survivors; to dual programs that provide sexual assault and domestic violence services to enhance the provision of direct inter-

(continued)

vention and related assistance services tailored for victims of sexual assault; and for projects that increase support for underserved populations.

The application is available on the Governor's Grant Portal at <https://www.kansas.gov/grants/index.do> or download a copy of the application at [http://www.grants.ks.gov/opportunities/federal-sexual-assault-services-grant-program-\(sasp\)](http://www.grants.ks.gov/opportunities/federal-sexual-assault-services-grant-program-(sasp)). All grant applications must be submitted via the Governor's Grant Portal by 11:59 p.m., December 5, 2017. To quickly locate the grant in the Grant Portal use "SASP" for the keyword in your search.

- |   |                               |
|---|-------------------------------|
| 1. Grading Inspection                         | 6. Contract documentation     |

On-Call contracts will be awarded using the qualifications-based selection procedure, with the following distinct characteristics:

- a. Single Solicitation for Multiple On-Call contracts: The Bureau of Local Projects will identify certain classifications of services for which On-Call contracts should be available and the number of consultant firms which ideally should be selected for such classifications in the event the services are needed in the future. (See KDOT form No. 1050 for classifications listed in the *Consultant Prequalification Questionnaire*.)
- b. In accordance with 23 CFR 172.9(a)(3), On-Call contracts will specify: (i) the maximum length of the contract period, including allowable contract extensions not to exceed 5 years (typically 4-year contract period with 1-year extension); and (ii) the maximum total contract dollar amount that may be awarded under such contract terms will not exceed \$2,000,000.00 per firm for each district in which the firm was selected.

KDOT will use the following criteria as the basis for selection of the consulting engineering firms:

1. Size and professional qualifications (20%)
2. Experience of staff (25%)

3. Word load of firm (20%)
4. Firm's performance record (25%)
5. Location and number of CIT inspectors on staff relative to each KDOT district (10%)

The firms accounting systems must have the following capabilities before the firm may be awarded a contract.

- Valid, reliable, and current costs must be available within the system to support cost and pricing data.
- Capability to provide a means of measuring the reasonableness of incurred costs.
- Capability to identify and accumulate allowable costs by contract or project records which will reconcile with the general ledger.
- Ability to provide supporting documentation of actual expenditures for each billing, based on costs.

Qualifications-Based Procedure for implementing Task Orders/Work Orders:

- a. Each consultant firm signatory to a current On-Call contract for the relevant classification(s) of technical services required will be notified by KDOT email listing all projects in region where consultant firm is qualified to render services. Consultant will respond to KDOT who will then forward all interested consultant firms to respective project LPAs.
- b. The notification will: (i) contain a description of the task(s) to be performed, the project, the schedule, and any other particular requirements; (ii) solicit written confirmation from each consultant firm as to the particular skill, specialized experience, technical competence, and qualification of the firm and employees available for assignment to perform the task(s) in a timely manner; and (iii) specify the date or deadline such confirmation must be submitted to and received by KDOT to be considered for the task(s).
- c. After the deadline, a Selection Committee will be convened and it may conduct interviews, by telephone or otherwise, to obtain supplemental information from consultant firms. The Selection Committee will review the information submitted, the past performance of similar services by the firms under consideration, as well as other relevant information, and select the most highly-qualified firm for the Task Order/Work Order. KDOT will notify all participating consultant firms of the selection.
- d. KDOT will prepare an independent estimate to be used for comparison purposes and as a basis to ascertain and negotiate a fair and reasonable cost for the services.
- e. Such first-ranked firm shall then submit a cost proposal for the Task Order/Work Order. A Negotiating Committee will be convened to evaluate the cost proposal and negotiate any changes. If negotiations cannot be reached, the next-ranked firm will be contacted to submit a proposal following the process through the ranked firms until negotiations are successfully concluded.

- f. When negotiations are successfully concluded, a written Task Order/Work Order reflecting the agreement of the parties shall be prepared for signature by duly authorized representatives of the parties.

Selection and notification process will be completed by December 15, 2017. If you have any questions, please feel free to contact Tod Salfrank at [Tod.Salfrank@ks.gov](mailto:Tod.Salfrank@ks.gov).

However, toxic substances that are required for normal husbandry practices may be stored in the animal areas if stored in a manner that prevents harmful exposure to animals.

(f) Drainage and waste disposal.

(1) Each licensee shall provide for the regular and frequent collection, removal, and disposal of animal and food wastes and other debris in a manner that minimizes contamination and disease risks.

(2) If present, disposal facilities and drainage systems shall be properly constructed, installed, and maintained in such a manner to avoid all foul odors and any backup of sewage.

(3) Each licensee shall ensure that any standing liquid in the animal enclosures is removed in an efficient manner so that the animals stay dry.

(4) Each licensee shall use trash containers for facility waste that are leakproof and shall keep tightly fitted lids on the containers at all times.

(g) Washing facilities. Washing facilities shall be provided for animal caretakers and shall be readily accessible. Washing facilities may include washrooms, basins, sinks, or showers. (Authorized by and implementing K.S.A. 47-1712; effective Nov. 17, 2017.)

**9-18-11. Additional requirements for indoor housing facilities and sheltered housing facilities.** The requirements in this regulation shall be in addition to the requirements in K.A.R. 9-18-10.

(a) Structure. The building or structure of each indoor housing facility and each sheltered housing facility shall be constructed so that temperature and humidity levels can be controlled and odors can be eliminated rapidly. The building or structure shall have at least one door for entry and exit that can be opened and closed. Any windows or openings that provide natural light shall be covered with glass, hard plastic, or a similar hard, transparent material.

(b) Heating, cooling, and temperature. Each licensee operating an indoor housing facility or a sheltered housing facility shall ensure that the facility is sufficiently heated and cooled to protect and provide for the animals' health and well-being.

(1) Each licensee operating an indoor housing facility or a sheltered housing facility shall ensure that, when dogs or cats are present, the ambient temperature in the facility does not fall below 45°F or 7.2°C for more than four consecutive hours and does not exceed 85°F or 29.5°C for more than four consecutive hours.

(2) Each licensee shall provide dry bedding, solid resting boards, or other means of conserving body heat whenever the ambient temperature inside the facility is below 50°F or 10°C.

(3) Except as approved by the attending veterinarian, a licensee operating an indoor housing facility or a sheltered housing facility shall not permit the ambient tem-

*(continued)*

perature in the facility to fall below 50°F or 10°C when any of the following dogs or cats are present:

(A) Any dog or cat not acclimated to lower temperatures;  
 (B) any dog or cat of a breed that cannot tolerate lower temperatures without stress or discomfort, including short-haired breeds; or

(C) any dog or cat that is sick, infirm, or of a young or advanced age so that the dog or cat cannot tolerate lower temperatures without stress or discomfort.

(c) Ventilation. When animals are present, each indoor housing facility or sheltered housing facility shall be sufficiently ventilated at all times to provide for the animals' health and well-being and to minimize odors, drafts, ammonia levels, and moisture condensation. Ventilation shall be provided by windows, vents, fans, or air conditioning units. The licensee shall provide auxiliary ventilation whenever the ambient temperature is at least 85°F or 29.5°C. Auxiliary ventilation may include fans, blowers, and air conditioning units. The licensee shall maintain the relative humidity at a level that ensures the health and well-being of the animals housed in the facility, in accordance with the directions of the attending veterinarian and generally accepted professional and husbandry practices.

(d) Lighting. Each licensee shall provide enough lighting in all animal areas of each indoor housing facility or sheltered housing facility to permit inspection and cleaning of the facility and observation of the animals. All animal areas shall be provided with a regular, uniform diurnal lighting cycle of either natural or artificial light when species-appropriate. Each primary enclosure shall be placed in a manner that protects the dogs and cats from excessive light. (Authorized by and implementing K.S.A. 47-1712; effective Nov. 17, 2017.)

**9-18-12. Additional requirements for outdoor housing facilities.** The requirements in this regulation shall be in addition to the requirements in K.A.R. 9-18-10.

(a) Restrictions.

(1) A licensee shall not keep any of the following categories of dogs or cats in outdoor housing facilities, unless that practice is specifically approved in writing by the attending veterinarian:

(A) Any dog or cat that is not acclimated to the temperatures prevalent in the area or whose acclimation status is unknown;

(B) any dog or cat of a breed that cannot tolerate the prevalent temperatures of the area without stress or discomfort, including short-haired breeds in cold climates; and

(C) any dog or cat that is sick, infirm, or of a young or advanced age so that the dog or cat cannot tolerate the prevalent temperatures of the area without stress or discomfort.

(2) If a licensee operating an outdoor housing facility does not know whether a dog or cat is acclimated, the licensee shall not keep that dog or cat in the outdoor housing facility whenever the ambient temperature is less than 50°F or 10°C.

(b) Shelter from the elements. Each outdoor housing facility shall include one or more shelter structures accessible to each animal, large enough to allow each animal in the shelter to sit, stand, and lie in a normal manner and to turn about freely, and of appropriate size to allow each

animal to conserve body heat. In addition to the shelter structures, each licensee shall provide one or more separate, outside areas of shade that are large enough to contain all the animals at one time and protect them from the direct rays of the sun. Each shelter structure in an outdoor housing facility for dogs or cats shall contain a roof, four sides, and a flat floor and shall meet the following requirements:

(1) Provide protection and shelter from the cold, heat, and direct effects of sun, wind, rain, snow and other elements;

(2) be provided with a wind break and rain break at the entrance; and

(3) contain clean, dry bedding material as necessary. Bedding shall be provided if the ambient temperature is below 50°F or 10°C. The licensee shall provide additional clean, dry bedding material when the temperature is 35°F or 1.7°C or lower.

(c) Prohibited shelter structures. A licensee shall not use metal barrels, cars, refrigerators, freezers, or any similar items as shelter structures. (Authorized by and implementing K.S.A. 47-1712; effective Nov. 17, 2017.)

**9-18-13. Primary enclosures.** (a) Construction. Each primary enclosure shall be designed and constructed of suitable materials so that the primary structure is structurally sound. Each licensee shall keep the primary enclosure in good repair.

(b) Maintenance. Each primary enclosure shall be constructed and maintained so that the primary enclosure meets the following conditions:

(1) Provides all the animals with shelter and protection from extreme temperatures and weather conditions that could be uncomfortable or hazardous;

(2) provides sufficient shade to protect from direct sun all the animals housed in the primary enclosure simultaneously;

(3) has floors that are constructed in a manner that protects the animals' feet and legs from injury. If the floor is constructed of mesh or slats, the floor shall not allow the animals' feet to pass through any openings in the floor. If any metal strands are used to construct a suspended floor for the primary enclosure, the metal strands shall be nine-gauge wire or wire that is greater than 1/8 of an inch in diameter or shall be coated with plastic, fiberglass, or a comparable material. If any suspended floor is used in a primary enclosure, that floor shall be strong enough that the floor does not sag or bend between structural supports; and

(4) if stacked cages are used to house animals, provides an impervious barrier between the levels of stacked cages. The barrier may be removed as needed for cleaning.

(c) Additional requirements for cats. The requirements of this subsection shall be in addition to the requirements in subsection (a), (b), and (e).

(1) Space. The licensee shall provide the following minimum vertical space and floor space for each cat that is housed in the primary enclosure, including any weaned kitten:

(A) Each primary enclosure housing cats shall be at least 24 inches (60.96 centimeters) high.

(B) Each cat weighing not more than 8.8 pounds (4 kilograms) shall be provided with at least 3.0 square feet (0.28 square meters) of floor space.

(C) Each cat weighing more than 8.8 pounds (4 kilograms) shall be provided with at least four square feet (0.37 square meters) of floor space.

(D) Each queen with nursing kittens shall be provided with an additional amount of floor space, based on her breed and behavioral characteristics and in accordance with generally accepted husbandry practices.

(E) The minimum floor space required by this subsection shall not include any space occupied by food or water pans. The litter pan may be considered part of the floor space if the pan is cleaned and sanitized.

(2) Litter. The licensee shall provide a receptacle in each primary enclosure that contains sufficient clean litter to contain excreta and other body wastes.

(3) Resting surfaces. Each primary enclosure housing cats shall contain one or more elevated resting surfaces that, when added together, are large enough to hold simultaneously all the occupants of the primary enclosure comfortably. Low resting surfaces that do not allow the space under them to be comfortably occupied by the animal shall be counted as part of the floor space.

(d) Additional requirements for dogs. The requirements of this subsection shall be in addition to the requirements in subsections (a), (b), and (e).

(1) Space.

(A) The licensee shall provide a minimum amount of floor space for each dog housed in the primary enclosure, including each weaned puppy housed in a primary enclosure, using the following calculation: the length of the dog or puppy from the tip of the nose to the base of the tail in inches plus six inches, squared, and then divided by 144, shall equal the required minimum floor space in square feet.

(B) The licensee shall provide each bitch that has nursing puppies with an additional amount of floor space, based upon the dog's breed and behavioral characteristics and in accordance with generally accepted husbandry practices, as determined by the attending veterinarian.

(C) The interior height of a primary enclosure shall be at least six inches higher than the head of the tallest dog in the primary enclosure in a normal standing position.

(2) Prohibited types of primary enclosures for dogs. The tethering of dogs shall be prohibited for use as a permanent primary enclosure.

(e) Innovative primary enclosures. Any licensee may use an innovative primary enclosure not meeting the floor area and height requirements specified in this regulation if the commissioner determines that the primary enclosure will provide the dogs or cats with a sufficient volume of space and the opportunity to express species-typical behavior. (Authorized by and implementing K.S.A. 47-1712; effective Nov. 17, 2017.)

#### **9-18-14. Cleaning, sanitization, and pest control.**

(a) Each licensee shall spot-clean daily all surfaces with which the animals come into contact. These surfaces shall be sanitized as necessary to avoid excessive accumulation of excreta, reduce disease hazard, avoid animal contact with excreta, and prevent or eliminate odors, insects, pest, and vermin infestation. If steam or water is used to clean the primary enclosure, whether by hosing, flushing, or other methods, the licensee shall first remove the animals, unless the enclosure is large enough to ensure

that the animals will not be harmed, wetted, or distressed in the process.

(b)(1) Each licensee shall clean and sanitize each used primary enclosure and each used food and water receptacle using one of the methods prescribed in paragraph (b)(3) before the primary enclosure or food and water receptacle is used to house, feed, or water another dog, cat, or social grouping of animals.

(2) The licensee shall sanitize all used primary enclosures and food and water receptacles for animals at least once every two weeks using one of the methods prescribed in paragraph (b)(3), and more often if necessary to prevent an accumulation of dirt, debris, food waste, excreta, and other disease hazards.

(3) Each licensee shall sanitize the surfaces of primary enclosures and the food and water receptacles using one of the following methods:

(A) Spraying all surfaces with steam under pressure;

(B) washing all surfaces with hot water that is at least 180°F or 82.2°C and with soap or detergent, using a mechanical cage washer or similar device; or

(C)(i) Washing all soiled surfaces with appropriate detergent solutions and disinfectants or with a product that is a combination of a detergent and a disinfectant that accomplishes the same purpose;

(ii) thoroughly cleaning the surfaces to remove all organic material and mineral buildup and to provide sanitization; and

(iii) rinsing with clean water.

(4) Each licensee shall remove any contaminated material that cannot be sanitized using the methods specified in paragraph (b)(3), including gravel, sand, grass, earth, or absorbent bedding, as often as necessary to prevent odors, diseases, pests, insects, and vermin infestation.

(c) Each licensee shall establish and maintain an effective program for the control of insects and external parasites affecting animals. Additionally, the licensee shall develop a plan for the management of birds and mammals that are pests or potential hazards so as to promote the health and well-being of the animals and reduce contamination by pests in animal areas. (Authorized by and implementing K.S.A. 47-1712; effective Nov. 17, 2017.)

**9-18-15. Compatible grouping.** No licensee shall house any animals in groups that are incompatible, including incompatibility due to age, sexual status, aggressive disposition, breed, species, contagious disease, or any other reasons. (Authorized by and implementing K.S.A. 47-1712; effective Nov. 17, 2017.)

**9-18-16. Separation of animals by gender.** All sexually intact adult animals shall be housed separately from all other sexually intact adult animals of the opposite sex within an animal shelter, rescue network, or pet animal foster home. (Authorized by and implementing K.S.A. 47-1712; effective Nov. 17, 2017.)

**9-18-17. Feeding and watering.** (a)(1) Each licensee shall meet the "adequate feeding" requirements as defined in K.S.A. 47-1701, and amendments thereto. Each licensee shall feed all animals as appropriate to species and age. All cats and dogs shall be fed at least once each day, unless restricted by written order by the attending

*(continued)*

veterinarian. The food shall be uncontaminated, wholesome, palatable, and of sufficient quantity and nutritive value to maintain the normal condition and weight of the animal. The diet shall be appropriate for each animal's age and condition.

(2) Each licensee shall provide a sufficient number of food receptacles for animals, which shall meet the following requirements:

- (A) Be easily accessible to all animals being fed;
- (B) be located so as to minimize contamination by excreta and pests;
- (C) be protected from rain and snow; and
- (D) either be discarded after one use or be easily cleaned and sanitized.

(b) Each licensee shall meet the "adequate watering" requirements as defined in K.S.A. 47-1701, and amendments thereto. Drinkable water shall be supplied in a sanitary manner and in adequate amounts at intervals suitable for each animal's species and either continuously accessible to each animal or supplied to maintain the health and well-being of each animal. If water is not continuously accessible, then water shall be provided at least twice daily for at least one hour each time or more often as conditions warrant, unless restricted by written order of the attending veterinarian or not species-appropriate. (Authorized by and implementing K.S.A. 47-1712; effective Nov. 17, 2017.)

**9-18-18. Contingency planning.** Each licensee shall develop, document, and follow a written contingency plan to provide for the humane handling, treatment, transportation, housing, and care of the animals on the premises if an emergency or natural disaster occurs. The plan shall be updated annually, be made available to the commissioner or the commissioner's representatives upon request, and at minimum include the following:

- (a) Identification of potential known risks, including power failures, fires, natural disasters, and faulty heating, ventilation, and air conditioning systems;
- (b) an outline of specific tasks required to be carried out in response to the identified emergency; and
- (c) identification of the individual or individuals responsible for carrying out the plan, along with contact information for each individual. (Authorized by and implementing K.S.A. 47-1712; effective Nov. 17, 2017.)

**9-18-19. Employees and volunteers.** Each licensee shall employ enough individuals to provide the level of husbandry practices and care required by the act and this article of the department's regulations. Each employee or volunteer who provides husbandry and care or who handles animals shall be supervised by an individual who has the knowledge, background, and experience in proper husbandry and care of animals to supervise others. The licensee shall ensure that the supervisor, other employees, and volunteers perform to these standards. (Authorized by and implementing K.S.A. 47-1712; effective Nov. 17, 2017.)

**9-18-20. Age of animal.** A licensee shall not sell, exchange, or adopt any animal if the animal is at an age at which doing so would be detrimental to the animal's health or well-being. No puppy or kitten may be sold, exchanged, or adopted until the animal is at least eight

weeks of age and has been weaned, which shall mean eating solid food and not nursing, for at least five days.

For the purposes of this regulation, weight and other factors may be used to approximate the age of an animal of unknown age. (Authorized by and implementing K.S.A. 47-1712; effective Nov. 17, 2017.)

**9-18-21. Adequate veterinary medical care.** Each licensee shall have an attending veterinarian who provides the licensee's animals with "adequate veterinary medical care," as defined in K.S.A. 47-1701 and amendments thereto. **9-18-22. Exercise.** (a) Each licensee shall develop, document, and follow a plan to provide dogs over 12 weeks of age, except bitches with litters, with the opportunity for exercise. The plan shall include written standard procedures. Forced exercise devices shall be strictly prohibited. If a dog is without sensory contact with another dog, the dog shall be provided with positive physical contact with humans at least daily. The opportunity for exercise may be provided in a number of ways, which may include the following:

(1) Providing group housing in cages, pens, or runs that provide at least 100 percent of the required space for each dog under the minimum floor space requirements of K.A.R. 9-18-13;

(2) maintaining individually housed dogs in cages, pens, or runs that provide at least twice the minimum floor space required by K.A.R. 9-18-13; and

(3) providing access to a run or open area at the frequency and duration prescribed by the attending veterinarian.

(b) If, in the opinion of the attending veterinarian, it is inappropriate for a dog to exercise because of the dog's health, condition, or well-being, the attending veterinarian shall document this exemption in writing. The licensee shall make this documentation available to the commissioner or the commissioner's representatives upon request. (Authorized by and implementing K.S.A. 47-1712; effective Nov. 17, 2017.)

**9-18-24. Animal breeders and animal distributors.** K.A.R. 9-18-10 through 9-18-15, K.A.R. 9-18-17, K.A.R. 9-18-19, and K.A.R. 9-18-22 shall not apply to animal breeders and animal distributors. **9-18-25. Prohibiting the sale or gift of certain animals by pet shops.** (a) A pet shop shall not sell any reptiles, offer any reptiles for sale, or offer any reptiles as a gift or promotional consideration unless a notice regarding safe reptile-handling practices meeting the requirements of subsection (b) is prominently posted or displayed at each location in the pet shop where the reptiles are displayed, housed, or held.

(b) Each notice regarding safe reptile-handling practices shall be the notice provided at no charge by the Kansas department of agriculture upon the request of any pet shop, any notice created by the centers for disease control and prevention, or any other notice that meets the following requirements:

"Always wash your hands thoroughly after you handle your pet reptile, its food, and anything it has touched.

"Keep your pet reptile and its equipment out of the kitchen or any area where food is prepared.

"Don't nuzzle or kiss your pet reptile.

Each rescue network manager shall be responsible for the intake of all dogs or cats in the rescue network. Each licensee that obtains a dog or cat from a veterinarian for the purpose of adopting shall comply with K.S.A. 47-1731, and amendments thereto. (f) Each rescue network manager shall process all documentation for each adoption of a dog or cat in the custody of the rescue network and for all spay and neuter deposits required by K.S.A. 47-1731, and amendments thereto. A copy of each of these documents shall be kept at the premises of the rescue network manager. Intact dogs, cats, puppies, or kittens may be adopted only from the premises of the rescue network manager or a licensed animal shelter.

**9-18-28. Pet animal foster homes.** (a) Rescue networks and animal shelters may utilize pet animal foster homes. Rescue networks and animal shelters shall require each of their prospective pet animal foster homes to sign a pet animal foster home agreement with the supervising rescue network or animal shelter.

(1) Each pet animal foster home utilized by a rescue network or animal shelter shall receive an initial on-site inspection as well as an annual on-site inspection by the rescue network manager or animal shelter representative. During the on-site inspection, the rescue network manager or animal shelter licensee shall determine the pet animal foster home's compliance with applicable housekeeping, sanitation, and husbandry standards pursuant to training provided by the commissioner. The pet animal foster home agreement and documentation of on-site inspections shall be kept by the rescue network manager or animal shelter licensee and shall be made available to the commissioner or the commissioner's representatives upon request.

(2) Each rescue network manager and animal shelter licensee shall keep records of all pet animal foster homes utilized by the rescue networks and animal shelter. At the beginning of each license year, each rescue network and animal shelter that utilizes pet animal foster homes shall submit an application and license fee for each pet animal foster home being utilized. All license fees submitted at the beginning of a license year shall be submitted as a single payment. During the license year, each rescue network manager and animal shelter licensee shall submit an application and license fee for any pet animal foster home to be utilized for which an application with the license fee was not submitted at the beginning of each license year. No rescue network or animal shelter shall utilize a pet animal foster home until the pet animal foster home has been issued a license.

(3) Each rescue network manager and each animal shelter licensee shall ensure that all pet animal foster homes utilized by the rescue network or animal shelter comply with the Kansas pet animal act and all applicable regulations.

(b) A pet animal foster home shall not foster dogs or cats for more than one animal shelter or rescue network at the same time.

(c) Each animal shelter licensee or rescue network manager using a pet animal foster home shall develop a plan of veterinary care to be followed by the pet animal foster home. The plan of veterinary care shall be recorded on the form specified in the definition of "adequate veterinary medical care" in K.S.A. 47-1701, and amendments thereto. This plan shall include the name of the licensed veterinarian whom the pet animal foster home shall contact in case of injury or illness and the name of the party responsible for the payment of treatment and office call charges. The pet animal foster home shall notify the sponsoring animal shelter or rescue network manager of any dog or cat receiving veterinary care within 24 hours of treatment. A copy of the plan of veterinary care shall be filed annually with the commissioner.

(d) A pet animal foster home shall not directly accept stray dogs or cats or any animal relinquished by its own-

er. Each pet animal foster home licensee wanting to accept stray dogs or cats or animals that are relinquished by their owners shall apply for and receive an animal shelter license before accepting these animals. Each rescue network manager shall be responsible for the intake of all animals in the care of the rescue network. No stray dog or cat may be placed with a pet animal foster home until the applicable requirements of K.S.A. 47-1710, and amendments thereto, have been met.

(g) A pet animal foster home licensee shall not house any intact dog or cat six months of age or older unless spaying or neutering is contraindicated by a licensed veterinarian. If a veterinarian recommends that the dog or cat should not be altered, the pet animal foster home shall obtain a copy of a written opinion by the veterinarian as to why the animal cannot be altered and an estimated time of when, if ever, the animal can be altered. A copy of the written opinion shall be kept by both the pet animal foster home and the rescue network manager or animal shelter.

(h) The animal shelter licensee or rescue network manager shall process all documentation for each adoption and all spay and neuter deposits required by K.S.A. 47-1731, and amendments thereto. Each intact dog, cat, puppy, or kitten shall be adopted directly from the animal shelter or, in the case of a rescue network, from the premises of the rescue network manager. Any altered dog, cat, puppy, or kitten may be adopted directly from the pet animal foster home only after all final adoption paperwork has been processed through the animal shelter or rescue network manager and all applicable requirements of K.S.A. 47-1710, and amendments thereto, have been met by a licensed animal shelter.

(i) Each animal placed with a pet animal foster home shall be evaluated every 180 days by the animal shelter licensee or rescue network manager to determine whether the animal should be returned to the animal shelter or should remain in the care of the pet animal foster home. The records of the animal shelter or rescue network manager and the pet animal foster home shall reflect the date on which the dog or cat was evaluated, the reason for the animal to remain in a pet animal foster home, and the name of the person at the animal shelter or rescue network who made the decision.

(j) Dogs or cats shall not remain in the care of one or more pet animal foster homes for more than 12 months without written permission from the commissioner. Each
