Facility Name: Lawrence Energy Center

Facility Address: 1250 N. 1800 Rd., Lawrence, KS 66044

The proposed action is to reissue an existing State/NPDES permit for an existing facility. This facility is an electrical generating power station that has a maximum capacity of 550 megawatts powered by two (2) coal fired high-pressure steam generators. The facility obtains makeup water from a surface water intake structure on the Kansas River for cooling tower and boiler use. Approximately 91% of the water withdrawn from the Kansas River is for cooling water systems use and the water intake is referred to herein as Cooling Water Intake Structure (CWIS). The proposed permit includes a schedule of compliance stating that the permittee has chosen the option to develop a closed loop system to meet zero liquid discharge for both the FGD (flue gas desulfurization) and bottom ash transport flows, in order to meet Federal regulations 40 CFR 423. KDHE has determined the facility's makeup water intake structure is a cooling water intake structure (CWIS) subject to the provisions of the Clean Water Act Section 316b and EPA regulations 40 CFR Part 125, Sub-part J for existing facilities. Regarding 316(b) Impingement Mortality Compliance, Evergy at the Lawrence Energy Center, employs and operates a Closed-Cycle Recirculating System (CCRS) pursuant to 40 CFR 125.94(c)(1) and minimizes makeup and blowdown flows of water withdrawn from the Kansas River. As such, it represents a Best Technology Available (BTA) for impingement. The proposed permit limits for total suspended solids, oil and grease, pH, total recoverable arsenic, total recoverable mercury, total recoverable selenium, nitrate + nitrite, free available oxidant, zinc, and whole effluent toxicity, as well as monitoring for flow, biochemical oxygen demand, total recoverable copper, total chloride, total sulfate, total phosphorus, sulfate, and priority pollutants.

This regulation deals with the continuing education requirements for licensed acupuncturists in Kansas. The revisions will extend the continuing education period

from 1 year to 2 years, there has been a removal of the limitation on CEU hours obtained online, there has been an addition of a quality requirement for hours obtained online, and overall there has been extensive reorganization for clarity, consistency, and brevity. This process involved the Acupuncturist Council and Kansas Association of Oriental Medicine. Additionally, the agency intends to comply with all public hearing requirements involved in the promulgation process. Although a qualified economist would be required to provide an expert opinion of the extent the regulation would impact economic growth, in the lay opinion of agency staff there will be no economic effect on specific businesses, sectors, public utility ratepayers, or local governments.
