The scope of the services will vary for each project and may include a bridge type selection, bridge design, road design, traffic engineering, hydrology/hydraulics, designer construction services, and permitting assistance for some projects. Geology and geotechnical services will be provided by KDOT early in the project development.

The project scopes include:

- Visit the project site location.
- Consultants to complete survey, identify in the proposal the surveying subconsultant
- Perform preliminary road and bridge design for plans to field check, to include determining the size, type, and location of the proposed bridge.
- Develop final plans.
- Provide electronic plan files compliant with KDOT Graphic Standards Manual, including CAD conformance checks and ControlCAD indexed DGN files with ProjectWise attributes.
- Provide construction cost estimates bi-annually as well as at every major project milestone.

Schedule

These projects must be let in Fiscal Year 2024, therefore the design activities must be scheduled to deliver complete plans between July 2023 and December 2023. These projects may follow an accelerated delivery schedule with some submittals required earlier than a typical KDOT design project to meet the letting requirements.

Response Format and Organization

The following outline is the expected submittal organization, content and page length for the technical proposals for each bridge group. Duplication of content in technical proposals is expected.

	Content	Pages
Consultant Bridge Group Preferences	FY24 Bridge Projects Form	1 page
Overview	<ul style="list-style-type: none"> • Qualifications and Experience <ul style="list-style-type: none"> ◦ Project manager for the group (and for each project, if needed) ◦ Names, qualifications, education, training, and expertise of proposed team members • Past performance on similar projects, including references and contact information • Group Delivery Process <ul style="list-style-type: none"> ◦ Approach to schedule ◦ Quality control process 	2 pages
Project Approach	Highlight concepts for cost-effective and optimized solutions for projects in each bridge group on which the consultant is proposing. Include unique qualifications or experience that may inform the selection of firms and assignment of bridge groups.	1-2 pages per bridge group

Selection Process

Per standard KDOT consultant selection process, consultants will be selected from the technical proposal submitted for each bridge group and awarded all projects in that bridge group(s). Selected consultants will proceed quickly through scoping, fee negotiation, and NTP. Each project within a bridge group will be contracted separately. Fee negotiation will include estimates for preliminary engineering and final design; there will not be a contract pause for final design negotiation after field check.

(continued)

Technical proposals will be evaluated based on the factors listed below to select the most qualified firms. All evaluation factors are weighted equally. Evaluation Factors:

- Qualifications and experience
- Past performance
- Group delivery process: approach to schedule
- Group delivery process: unique qualifications and solutions
- Familiarity with KDOT design standards and project area

The KDOT Consultant Selection Committee will select the most highly qualified firms expressing interest based on qualifications and experience, past performance, group delivery process, project group approach, and familiarity with KDOT design standards and project area.

The selected firms will be asked to enter into negotiations with KDOT for an agreement. In the event KDOT cannot reach agreement with a selected firm, it will terminate negotiations and commence negotiations with the next highest ranked firm, and so on, until either agreement is reached for a satisfactory scope of services for a fair and reasonable price, or KDOT decides to pursue other alternatives.

The firm’s accounting systems must have the following capabilities before the firm may be awarded a contract.

- Valid, reliable, and current costs must be available within the system to support actual costs and pricing data.
- Capability to provide a means of measuring the reasonableness of incurred costs.
- Capability to identify and accumulate allowable costs by contract or project records which will reconcile with the general ledger.
- Ability to provide supporting documentation of actual expenditures for each billing, based on costs.

Questions can be submitted at kdot.designcontracts@ks.gov.
